

# "M16" Stand

1

	<b>Dimensions (H / L / W):</b> 154,5 x 61,7 x 3,5 cm		<b>Construction materials:</b> iron
	<b>Weight:</b> 7,3 kg		<b>External surface treatments:</b> fire painting

## // Product Description //

The structure of the stand is made of iron tubular. The structure is composed of a "base" with opening to the deck and a vertical part called "supporting signage" with a hole for the application of the signs. The lower part of the stand allows to get a good stability that can be increased with orange bags. The opening is bound by two joints that allow to put the stand in vertical position. At the top of the stand there is a bracket which allows the application of a flashing light. The stand is made in order to reduce space footprint and facilitating greater convenience and ease of use; all these facilitations increase the security of the workers.

## // Working Description //

The stand can guarantee the stability of the sign in any road condition, the lower edge of the signal is conformed to the italian reference standards. The stand allows the installation of the following signs:

- Disc diameter 90 cm
- Revolving disc diameter 90 cm
