

- **Code:** 104730025
- **Description:** Flexible Eva Defleco - 6 HI Grade inserts

#### ■ Dimensions and technical characteristics

Body dimensions:

- Height 33 cm
  - Length 11,5 cm
  - Width 1,5 cm
- 
- Total Weight 1 kg

#### ■ External surface treatments

- 6 inserts in High Intensity Grade tape (H.I.)

#### ■ Product description

The delineator consists of a lower support base made of black polypropylene and of a vertical body produced in synthetic co-polymer resin (EVA) of color red.

The composition of the materials makes the delineator resistant to impacts and crushing due to the passage of vehicles, and very elastic so to come back to the original vertical position without detaching from the road level.

The red color trapezoidal part (vertical body) is high visible through the application of 6 reflective inserts in Class II film. The application on the ground is with the base. It has at the bottom, a special configuration that grant the maximum grip with the ground through the application of glues.

#### ■ Working Description

The delineator is used to delimit the two directions, opposite or parallel, and to delimit work zones. The defleco is used to delimit work zones with duration longer than 2 days.
