| | Weight: curbstone: 7,5 kg male terminal: 2,9 kg female terminal: 2 kg | | External surface treatments: application of elastoplastic yellow reflective inserts |

Code: 107605121 - Curbstone 5 cm yellow
Code: 108615112 - Curbstone 5 cm yellow male terminal
Code: 108625112 - Curbstone 5 cm yellow female terminal
Code: 107305000 - Curbstone 5 cm black with yellow bands

Product Description

The curbstone is made of vulcanized rubber, with high elasticity and high resistance to the hurts and crushing of the vehicles.

The curbstone is yellow painted to reduce the ageing and increase the resistance against the weathering.

To ensure a better visibility during the night, the curbstone are integrated with yellow reflective tape inserts.

The lower part has a shape that grant the water flow. The application of the product is made using fixing screws.

The terminal is yellow painted to reduce the ageing and increase the resistance against the weathering, to ensure a better visibility during the night, the terminal is integrated with yellow reflective tape (diamond grade).

The lower part of the terminal has a shape that grant the water flow.

There are a male and female terminals that must be connected to the body of the curbstone using 2 fixing screws.

Working Description

The rubber curbstone is used to delimit reserved lanes where only some vehicles can transit. The curbstone longitudinally located in series replace the yellow lines.

Miscellaneous

The curbstone must be strongly installed to the ground, in order to avoid shifts and detachments; however it must be easy removable as well.

Packaging

| | |
|------------------------|--|
| (pallet - 100 pcs) | Dimension curbstone: 100x100x h 100 cm weight: 760 kg |
| (pallet - 100 pcs) | Dimension male terminal: 80x120x h 70 cm weight: 300 kg |
| (pallet - 100 pcs) | Dimension female terminal: 80x120x h 70 cm weight: 210 kg |
