Product Description

The 12V 180 Ah battery is used in electrical and electromechanical products, in order to guarantee the correct working of the luminous devices and for the function of the mechanical parts. The batteries can be recharged many times.

There are 2 handles on the sides in order to facilitate the transport and the installing on the devices.

The battery is mainly used on the following products:

- Mobile traffic light near working zones.
- Sequential systems
- Mechanical flag-waver
- Trailers
- Directional panels of 8 and 13 LEDs lenses
- Special applications with 12 V power

Product Description

Positive plaques:

- Type of lead: Pb- Sb
- Type of grid: BF

Negative plaques:

- Type of lead: Pb- Sb
- Type of grid: BF

Separators:

- Type: daramic – HP
- Thickness: 1,3 mm
- Rated capacity: 12 Volt
- C20 capacity: 100 Ah

Packaging
