Over 40 years have passed since we have created Sisas. Intense years, full of road experience, the aim was to fulfil a dream: produce road safety signs to make the difference. This is a dream still with us, because protect who travels or works on the road is never enough!

In the 80s we entered in a young market and we wanted to offer a wide range of products, with attention to every details and to high quality, offering significantly faster production and delivery times than the standard one. In those years every businessman built his own success day by day, making use and experience of events and work processes but always loyal to their personal values with dedication and enthusiasm. After only a year and a half, we reached a balanced budget. An exceptional result, which gave solidity and thrust to invest, to catch and satisfy the needs of a country in transition in its infrastructures and with the aim to create diffused road network.

Today, as at that time, we pay particular attention to safety, work environment and technological innovation, ensuring excellent technical and qualitative requirements. Thirty years ago, these choices allowed us to obtain Ministerial Authorization No. 005 for the production of road signs: an important recognition for our company.

Since that time, we have never stopped looking forward!

We passed from 1 to 3 sites, from 200 to 9,000 square meters, from 3 to 130 employees, and to a constant growth of technical and sales assistants network. From safety signs we have rapidly expanded our offer by adding road signs, luminous signals, rubber products, as well as mirrors, accessories, and work-zones devices, up to the most advanced and complex monitoring and traffic control devices and interactive signages and sensors.

Today with our full range of products we can be the unique partner for all those who design, build or maintain any type of road and, in particular, the ideal partner for companies who also require specific skills and qualified consultancy.

The future is digital. We are ready!

We have all the necessary technologies for this great and unchanged dream: make every citizen feels safer every time he travels on the road, to reach any destination.

In the future I imagine Sisas able to promote and create the "new mobility". Because we always look ahead!

My thanksgiving goes to the whole Sisas team, to the partners, to the assistants, to the customers and a best wishes for a light, safe and bright route.

The President
Giovanni Battista Mario Pisticchia

LOOK FORWARD!

VISION & MISSION

On the road, we are looking forward, always

Sisas is today the landmark in the signs and road safety sector using its awareness and with 40 years of experience and successes, We are taking care of the present to build a future where people's life is better.

Your journey will be a safe route thanks our work and our technologies.

We are all traveling, every day, to make our dreams come true, for work, to bring our children at school or to share their passions. We are traveling to visit a friend or relatives, for a holiday or simply for the pleasure to admire the beauty around us.

Our mission is to take care of the route you will take, making it safe and pleasant.

We want to take you everywhere you want to go.
And to do this we must always look ahead.
Always.

We want to create innovation, build intelligent systems, make technology at the service of safety, so that the road comes alive and communicates with the user.

For 40 years, in Sisas, we have been thinking of roads that look ahead. Now let's do it together!

"Only those who will risk going too far can possibly find out how far one can go"
(Thomas Stearns Eliot)

The road to digital:

Technological innovation has radically changed the production methods of road signs. 40 years ago, all the signs were manually made. Screen printing and new cutting techniques, in addition to the use of numerical control plotters, made possible to optimize the production process which, even today, can be considered exclusive and handmade: they are, in fact, made **"unique pieces", for the needs of every type of road and territory.**

The peculiarity and uniqueness of each single piece and the need to always guarantee the highest quality standard, represented the main aim for Sisas S.p.A. The choice of **developing a "digital printing" of excellence**, has been integrated in a lean process (Lean Production TPS) that characterizes, enhances and optimizes all company processes and activities.

Today, through printing and cutting plotter, it is possible to produce "unique pieces in series" with benefits in terms of huge production flexibility. From a project created with special software, which responds to the colorimetric and dimensional characteristics in compliance with the regulations, the executive is prepared and the finished signal is created in a few minutes.

We have selected the best technologies currently available in the market:

- 3M (Digitai Printing) films, inks and film protectors
- DURST RHO 163 TS SERIES plotter
- ZUND G3 XL-3200 cutting plotter

From the synergy of the top-of-the-range products of these three companies, world leaders in each of their sectors, and thanks to our experience and skills, **we are able to produce and offer signs with quality, compliance, technological innovation, durability, and certification.**

- **Class 1 : minimum guarantee 7 years** (UNI 11480 "lower performance level")
- **Class 2 : minimum guarantee 10 years** (UNI 11480 "basic performance level")
- **Class 2s: minimum guarantee 10 years** (UNI 11480 "superior performance level")

With the 3M MCS Warranty for Traffic program, the warranty is extended up to 12 years (in line with EN 12899-1) for the following types of films:

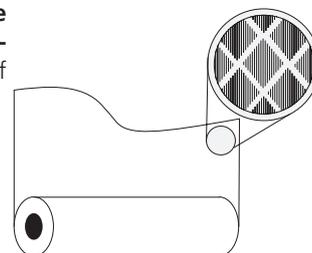

- 3M™ High Intensity™ Prismatic 3930DS Series
- 3M™ Diamond Grade™ DG3 Prismatic 4090DS Series

3M™ Diamond Grade™ DG3 Prismatic: maximum yield for the greatest possible safety!

- **Longer duration** (guaranteed up to 12 years)
- **Better photometric yield** ("full cube corners" technology)
- **Greater reflectivity** than films with microspheres or trihedral microprisms
- **Greater perceptibility:** better detection, identification and reading from all distances

3M™ Diamond Grade™ DG3 Prismatic Film is designed to be an effective wide angle reflective tool regardless of its orientation on the media (vertical or horizontal) or final orientation of the installed sign.

The "prism" structure gives greater reflection.

The particular cut involves only a part of the prisms and cusps (dead corners), allowing the light to be reflected almost totally back, instead of dispersing, **guaranteeing the highest refractive characteristics and a very high visibility** in any condition of engagement of the signs and the driving position of any vehicle.

/ Permanent Road Signs

The road is close to our hearts and our mission includes everything that makes it safer.

Sisas ensures the complete availability of solutions and products useful for meeting the requirements imposed by the Highway Code and we will support you wherever these needs cannot be overlooked.

In this section you will find useful information and tips for all road users, to protect them from the hazards that, despite all efforts, are present under normal driving conditions.

Road Mirror "Dedalo VS"

Description:

They are used in low visibility conditions, especially at crossings, and inside of parkings, mounted on poles or on wall shelves.

Strengths:

Reduced transportation costs thanks to smaller overall shipment volume. Less trips, leading to lower CO2 emissions. Optimized storage space and reduced warehousing costs. More compact pallets and simplified internal handling, facilitating

picking. Quick and easy on-site assembly with lightweight, manageable components. Modular structure allows replacing the mirror and/or rings without changing the entire housing. Available in various colors, with aesthetic customization options for urban, corporate, or green environments. Branding options: logo on the base, corporate colors, and use of recycled materials (recycled PP).

	Dimensions: Road mirror box: 63 x 63 x 12,5 cm		Construction materials: polypropylene back body, the mirror surface is made of polymethylmethacrylate material
	Weight: 3,10 kg		External surface treatments: aluminized acrylic

Road Mirror "Dedalo L" W/R and Y/B

Description:

They are used in low visibility conditions, particularly at crossings. The yellow and black model is specifically designed for dangerous areas in production facilities or warehouses.

Strengths:

Reduced transportation costs thanks to smaller overall shipment volume. Less trips, leading to lower CO2 emissions. Optimized storage space and reduced warehousing costs. Maximize shipping efficiency

– 50% more mirrors per pallet than Giotto and Archimede models. Quick and easy on-site assembly with lightweight, manageable components. Modular structure allows replacing the mirror and/or rings without changing the entire housing. Available in various colors, with aesthetic customization options for urban, corporate, or green environments. Branding options: logo on the base, corporate colors, and use of recycled materials (recycled PP).

	Dimensions: Road mirror box: 63 x 63 x 9,5 cm		Construction materials: Polypropylene back body, the mirror surface is made of Polymethyl methacrylate material
	Weight: 3,10 kg		External surface treatments: aluminized acrylic, red or black inserts

Road Mirror "Icaro"

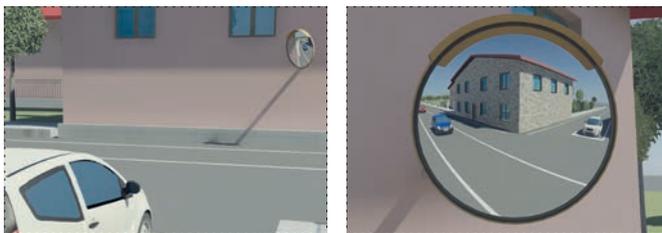

Description:

They are used in low visibility conditions, especially at crossings, and inside of parkings, mounted on poles or on wall shelves.

Strengths:

Increase the visibility, the mirror is resistant to hurts and crushings.

	Dimensions (H / L / W): box road mirror Ø 50 cm: 52 x 52 x 13 cm box road mirror Ø 60 cm: 62 x 62 x 13 cm box road mirror Ø 70 cm: 72 x 72 x 15 cm box road mirror Ø 80 cm: 82 x 82 x 19 cm box road mirror Ø 90 cm: 91 x 91 x 19 cm	Weight: Ø 50 cm: 2,5 kg / Ø 60 cm: 3,2 kg / Ø 70 cm: 4,3 kg / Ø 80 cm: 5,1 kg / Ø 90 cm: 6,3 kg
	Construction materials: polypropylene back body, the mirror surface is made of polymethylmethacrylate material	
	External surface treatments: reflecting part in aluminized acrylic	

Code: 909021006

Code	Description
909021006	Wall shell with plate for mirror

Code	Description	Pallet
909035005	Road mirror "Icaro" Ø 50 cm	39 pcs
909035006	Road mirror "Icaro" Ø 60 cm	30 pcs
909035010	Road mirror "Icaro" Ø 70 cm	17 pcs
909035011	Road mirror "Icaro" Ø 80 cm	12 pcs
909035013	Road mirror "Icaro" Ø 90 cm	12 pcs

Road Mirror "Tiziano"

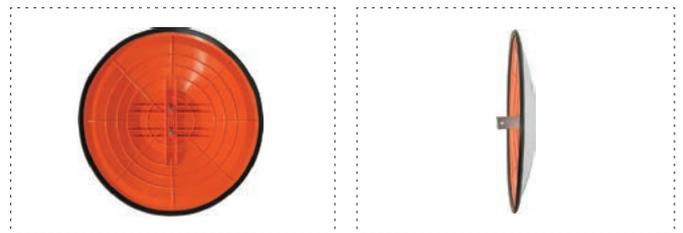

Description:

They are used in low visibility conditions, especially at crossings, and inside of parkings, mounted on poles or on wall shelves.

Strengths:

Made of plastic material which is resistant to the weathering. It can be installed on Ø 60 mm and 48 mm poles. Thanks to its lighter weight and to the low thickness, the mirror storage and transportation is reduced a lot.

	Dimensions: Road mirror box: 62 x 62 x 6,5 cm	Construction materials: polypropylene back body, the mirror surface is made of polymethylmethacrylate material
	Weight: 2,3 kg	External surface treatments: aluminized acrylic

Code: 909021006

Code	Description
909021006	Wall shell with plate for mirror

Code	Description	Pallet
909035054	Road mirror "Tiziano" Ø 60 cm	51 pcs

Road Mirror "Giotto"

New rear support

Description:

They are used in low visibility conditions, especially at crossings, and inside of parkings, mounted on poles or on wall shelves.

Strengths:

Increase the visibility, the mirror is resistant to hurts and crushings.

Road Mirror "Raffaello"

New rear support

Description:

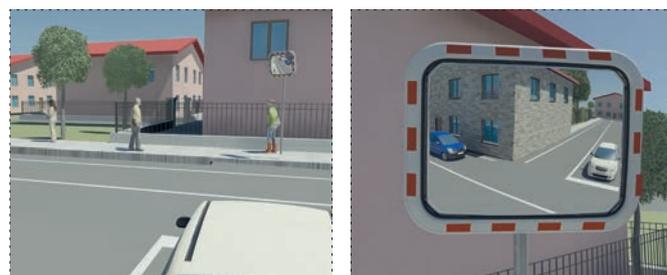

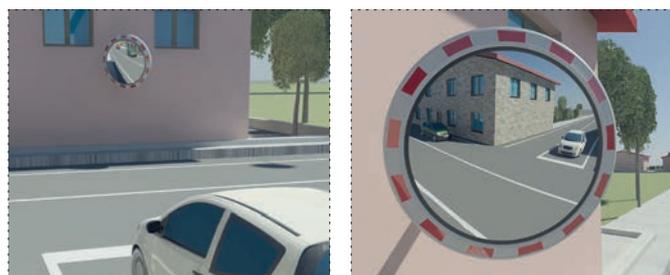

They are used in low visibility conditions, especially at crossings, and inside of parking, mounted on poles or on wall shelves.

Strengths:

Increase the visibility, the mirror is resistant to hurts and crushings.

	Dimensions (H / L / W): box road mirror Ø 50 cm: 68 x 68 x 12 cm		Weight: Ø 50 cm: 3 kg / Ø 60 cm: 3,7 kg / Ø 80 cm: 6 kg / Ø 100 cm: 10 kg		
	box road mirror Ø 60 cm: 73 x 73 x 11 cm			Construction materials: aluminium-plated acrylic with a black rubber gasket, the back body in high impact white material

Road Studs

Description:

Very high effectivity reflector mirror delineator used in paths and driveways, guidance lines, roundabouts and mountain roads.

Strengths:

Increase the visibility, the mirror is resistant to hurts and crushings. Solid piece construction: "V" shape of galvanized sheet support, easy installation, greater durability.

909037052

	Dimensions (H / L / W): 12 x 7 x 7 cm Reflector 13,8 x 6 cm	Construction materials: Type R2 retroreflector Body material: Aluminum body + Galvanised metal Lens material: PMMA Color: Yellow
	Weight: 150 gr

909037053	Withe/Red road stud

Rubber Angles Protector

Description:

The protector is applied on the parking edges in order to protect the vehicles by accidental impacts, the installation is made using 6 screws.

Strengths:

High elasticity rubber product, resistant to the hurts and to the weathering, good visibility and easy installation.

Parking Stop

Lockable

Description:

Folding bollard designed to prevent unauthorized parking of vehicles in private areas.

Strengths:

Lockable in vertical position. Easy installation. Fixing to the ground using fixing screws.

121100005

	Dimensions: 80x12,8x8 cm		Construction materials: High elasticity vulcanized rubber product
	Weight: 2,15 kg		External surface treatments: application of 4 yellow reflective inserts

h 3 cm Rubber Speed Moderator

(h 3 x 60 x 48 cm) **50**
4 Screws

Description:

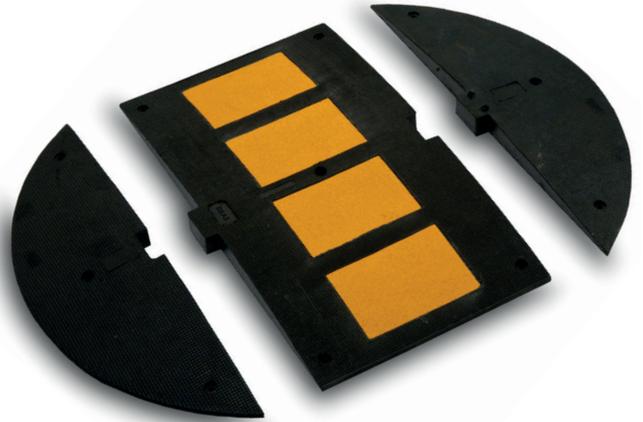

The device is mounted on streets where the speed limit is 50 km/h. It can be installed in all the places where you want to keep a moderate speed.

Strengths:

Modular, elastic and resistant to the crushing, the yellow inserts guarantee high night visibility.

h 5 cm Rubber Speed Moderator

(h 5 x 90 x 50 cm) **40**
5 Screws

Description:

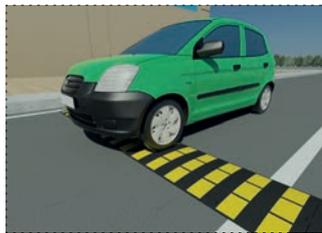

The device is mounted on streets where the speed limit is 40 km/h. It can be installed in all the places where you want to keep a moderate speed.

Strengths:

Modular, elastic and resistant to the crushing, the yellow inserts guarantee high night visibility.

	Dimensions (H / L / W): speed moderator: 3 x 60 x 48 cm terminal: 3 x 60 x 22 cm insert: 12 x 17,5 cm		Construction materials: High elasticity vulcanized rubber product
	Weight: speed moderator: 9,80 kg terminal: 3,5 kg		External surface treatments: application of 6 elastoplastic yellow reflective inserts

	Dimensions (H / L / W): speed moderator: 5 x 90 x 50 cm insert: 24,6 x 16,7 cm terminal: 5 x 90 x 27 cm		Construction materials: High elasticity vulcanized rubber product

h 5 cm Rubber Curbstone

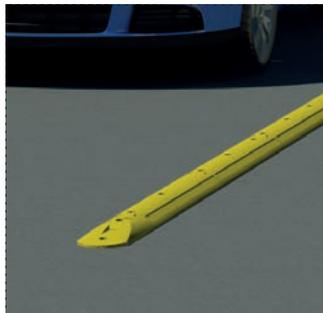

Description:

It is a rubber product used for safe solution that provides a visual separation between vehicle and bicycle lanes. Ideal for use anywhere with bicycle traffic, the lane delineators keep vehicles and bikes traffic in their respective lanes.

Strengths:

High elasticity rubber product, resistant to the hurts and to the weathering, good visibility during the night.

	Dimensions (H / L / W): curbstone: 5 x 100 x 16 cm insert: 98 x 2,5 cm male terminal: 5 x 52,5 x 16 cm female terminal: 5 x 42,5 x 16 cm insert: 3,9 x 2,5 cm		Construction materials: High elasticity vulcanized rubber product
	Weight: curbstone: 7 kg male terminal: 2,9 kg female terminal: 2,9 kg		External surface treatments: application of elastoplastic yellow reflective inserts

Temporary Signs Systems

Over the years, backed up by a long-standing tradition in the temporary signage industry, Sisas has consolidated and improved its expertise by offering products whose technology and quality meet all the needs of road construction sites. Sisas is able to offer customized products that meet the specific needs of its customers by providing technical departments capable of supporting them in the most critical situations dictated by temporary conditions that alter the route traffic normally flows.

Flashing Light "E-One Yellow"

Fresnel Lens

Description:

Yellow flashing light with transparent lens, mono LED, working with one or two batteries. The device is mainly used in suburban and highways working zones and for supplementing normal signals.

The warning light can be positioned using the triangular connection set on the lens or with a rear bracket. Available in one or two sides lens. Option only at night or 24 hours.

Strengths:

Because of the innovative Fresnel lens, the device can guarantee an high luminous emission visible even from great distances. Thanks to the only one LED, the device has a very low consumption.

	Certifications: In compliance with UNI EN 12352		Power supply: 6 V _{dc}		On/off switch: external
	Light source: 3W yellow led		Type of battery: nr. 2 4R25 batteries of: 25 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm
	Light emission: standard / flash / triflash		Duration: standard 430 h		Weight: 0,7 Kg
	luminous intensity: Class L8G		Twilight: yes		Lenses: Fresnel lens

Code	Description	Pack	Pallet

Flashing Light "E-One Red"

Fresnel Lens

Description:

Red steady light with transparent lens, mono LED, working with one or two batteries. The device is mainly used in suburban and highways working zones and for supplementing normal signals.

The warning light can be positioned using the triangular connection set on the lens or with a rear bracket.

Strengths:

Because of the innovative Fresnel lens, the device can guarantee an high luminous emission visible even from great distances. Thanks to only one LED, the device has a very low consumption.

	Light source: 3W red led		Power supply: 6 V _{dc}		On/off switch: external
	Light emission: red steady light		Type of battery: nr. 2 4R25 batteries of: 25 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm
	Luminous intensity: Class L7		Duration: 500 h		Weight: 0,7 Kg
	Certifications: In compliance with UNI EN 12352		Twilight: yes		Temperature: -40 °C - +85 °C

Code	Description	Pack	Pallet
20200081	E-one red with button	12 pcs	24 packs

Flashing Light "EuroFlash Yellow"

Description:

Yellow flashing light, with one or two batteries, is mainly used in working zones, urban areas and for supplementing normal signals. The warning light can be positioned using the

triangular connection set on the lens or with a rear bracket.

Strengths:

Double-sided optic, low consumption, 360° rotation, internal switch to protect the device from accidental switching, activation is made by a "special key". Practical, and ease to use.

	Light source: 2 leds for each side		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: standard yellow flashing light		Type of battery: nr. 2 4R25 batteries of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 35,5 x 19,5 x 9,5 cm
	Luminous intensity: L3		Duration: 713 h / 2500 h / 4500 h		Weight: 0,55 Kg
	Lenses: yellow lens		Twilight: yes		Temperature: -15 °C - +85 °C

Code	Description	Pack	Pallet
20200026	Euroflash yellow	12 pcs	24 packs

Flashing Light "EuroFlash Red"

Description:

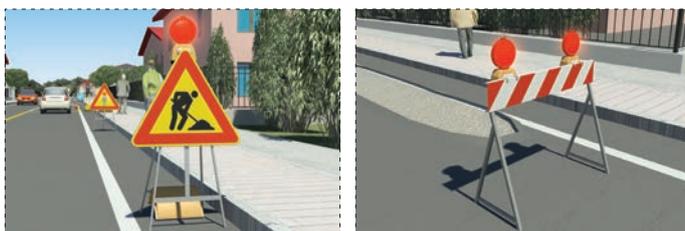

Red steady light, with one or two batteries, is mainly used in working zones, urban areas and for supplementing normal signals. The warning light can be positioned using the

triangular connection set on the lens or with a rear bracket.

Strengths:

Double-sided optic, low consumption, 360° rotation, internal switch to protect the device from accidental switching, activation is made by a "special key". Practical, and ease to use.

	Light source: 2 leds for each side		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: red steady light		Type of battery: nr. 2 4R25 batteries of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 35,5 x 19,5 x 9,5 cm
	Luminous intensity: 2 cd		Duration: 105 h / 370 h / 680 h		Weight: 0,55 Kg
	Lenses: red lens		Twilight: yes		Temperature: -15 °C - +85 °C

Code	Description	Pack	Pallet
20200023	Euroflash red	12 pcs	24 packs

Flashing Light "One Yellow"

Description:

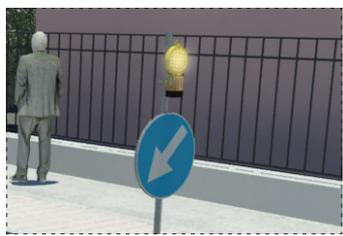

Yellow flashing light with one battery is mainly used in working zones, urban areas and for supplementing normal signals. The warning light can be positioned using the

triangular connection set on the lens or with a rear bracket.

Strengths:

Double-sided optic, low consumption, 360° rotation, internal switch to protect the device from accidental switching, activation is made by a "special key". Practical, and ease to use.

	Light source: 2 leds for each side		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: standard yellow flashing light		Type of battery: nr. 1 4R25 battery of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 35,5 x 19,5 x 9,5 cm
	Luminous intensity: L3		Duration: 358 h / 1280 h / 2300 h		Weight: 0,5 Kg

Flashing Light "One Red"

Description:

Red steady light with one battery is mainly used in working zones, urban areas and for supplementing normal signals. The warning light can be positioned using the triangular connection set on the

lens and besides it has a rear bracket.

Strengths:

Double-sided optic, low consumption, 360° rotation, internal switch to protect the device from accidental switching, activation is made by a "special key". Practical, and ease to use.

	Light source: 2 leds for each side		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: red steady light		Type of battery: nr. 1 4R25 battery of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 35,5 x 19,5 x 9,5 cm
	Luminous intensity: L3		Duration: 53 h / 190 h / 340 h		Weight: 0,5 Kg
	Lenses: red lens		Twilight: yes		Temperature: -15 °C - +85 °C

Code	Description	Pack	Pallet
202000007	One red	12 pcs	24 packs

Flashing Light "Flashing Light Yellow with Solar Panel"

Description:

The flashing light is essential on road construction sites to enhance visibility at night or in low-visibility conditions. It should be practical and easy for operators to use. During the nighttime or

low visibility, barriers must be equipped with flashing or steady yellow lights, synchronized or sequential, to highlight the edges of the work area, and can also be installed above signs.

Strengths:

The lens ensures even light distribution without reducing the LED intensity. On top, there is a handle for hook installation and a 0.4 W photovoltaic module. Low consumption, high durability.

	Light source: 6 high brightness leds		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: standard yellow flashing light		Type of battery: Integrated battery pack 12VDC 150 mA		Dimensions (H / L / W): 33,5x19x10 cm
	Luminous intensity: L3		Duration: 120h/150h with charging of 8 hours		Weight: 0,72 Kg
	Lenses: yellow lens		Twilight: yes		Temperature: -20 °C - +85 °C

accessories

Code: 202000059

Code	Description	Pack	Pallet
202000126	Flashing Light Yellow with solar panel	12 pcs	24 packs

Flashing Light "Flashing Light Red with Solar Panel"

Description:

The flashing warning light is essential in all road works to enhance standard signage during nighttime and in low-visibility conditions. It is valued for its practicality and ease of use by

workers. The device is mainly used in operating areas that must be equipped with fixed red lights to ensure the safety of road users and pedestrians in poor visibility conditions.

Strengths:

The lens ensures even light distribution without reducing the LED intensity. On top, there is a handle for hook installation and a 0.4 W photovoltaic module. Low consumption, high durability.

	Light source: 6 high brightness leds		Power supply: 6 V _{dc}		On/off switch: inside
	Light emission: red steady light		Type of battery: Integrated battery pack 12VDC 150 mA		Dimensions (H / L / W): 33,5x19x10 cm
	Luminous intensity: 2 cd		Duration: 120h/150h with charging of 8 hours		Weight: 0,72 Kg
	Lenses: red lens		Twilight: yes		Temperature: -20 °C - +85 °C

accessories

Code: 202000059

Code	Description	Pack	Pallet
202000123	Flashing Light Red with solar panel	12 pcs	24 packs

Flashing Light "E-ONE STAR Yellow"

Yellow Fresnel Lens

Description:

E-One Star is a one side flashing light with yellow lens, mono Led, working with one or two batteries. The device is mainly used in working zones to integrate the horizontal/vertical

signs, especially during the night. It has a rotation of 360° so to direct the light source in the desired direction.

Strengths:

High brightness warning light with only one led, reduced consumption. Easy handling for the workers. With the fixing accessories it can be put in different supports, granting a safe work zone area.

Brighness L8M

	Certifications: In compliance with UNI EN 12352		Power supply: 6 V _{dc}		On/off switch: external
	Light source: 1W yellow led		Type of battery: nr. 2 4R25 batteries of: 25 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm

Flashing Light "Led optic DS200 mm Fresnel with Amber Lens"

Protection Grade **IP 65/67**

Description:

New and improved Fresnel Led light with **amber lens** for application in work zones, highway, railway. The light is in compliance with UNI EN12352 Class L8H. Designed and manufactured in Europe by the companies of Sisas group. It is made by an innovative PMMA optical assembly consisting of a series of amber Fresnel lenses that can deflect and diffuse the light to obtain an efficient light output with a reduced number of LEDs.

Strengths:

The 19 power white LEDs permit to reach the L8H class of brightness without resorting the use of traditional lamps, so that we can have a reducing power consumption and longer life. Fully programmable by remote control (optional) it offers the possibility to change flashing modes and adjust the brightness in relation to ambient light without any electronic modification and to have a wide range of versions in a single product.

Flashing Light "Led optic DS200 mm Fresnel Slim with Amber Lens"

Protection Grade **IP 65/67**

New!

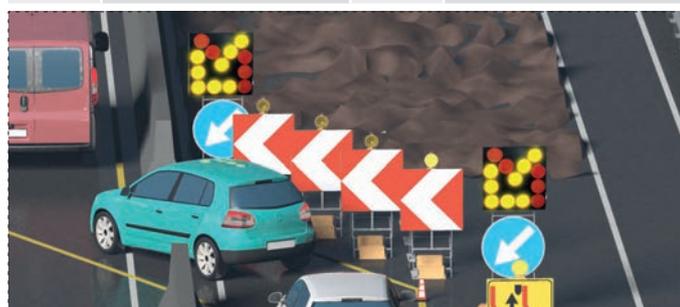

it can be fitted with an **optional remote control** that ensures high versatility allowing to choose the most suitable type of flash. (SEE PAG. 32)

The body of only 5.8 cm is made of impact-resistant weather-resistant, with anti-UV material. Thanks to its compact size, it can be used for a wide range of applications (mounted on structures, panels, on road signs) or with the special bracket on poles, cones, W/R panels for sequential systems. Silicon o-ring to ensure a perfect IP protection.

	Certifications: in compliance with UNI EN 12352		Light source: 19 SMD Led		Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah		Consumption: Average 192mA Pick 740mA
	Luminous intensity: Class L8H		Power supply: from 8 to 30 V _{cc}		Duration: standard flash mode 93h / 208h / 520h / 937h tri-flash mode 280h / 625h / 1562h / 2812h		Dimensions: 21,9 x 21,9 x 5,8 cm 21,9 x 21,9 x 4,0 cm (Slim)
	Light emission: yellow flashing (amber)		Twilight: on request		Photovoltaic kit: 50 W		Weight: 0,630 Kg with 1 meter cable 0,496 Kg with 1 meter cable (Slim)

Kit for Warning Trailer

Description:

It is composed of 25 LED lenses and a control unit. The device can be used on any type of structure thanks to the ease of assembly of the lenses.

Strengths:

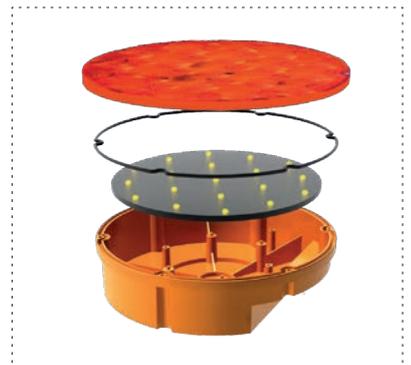

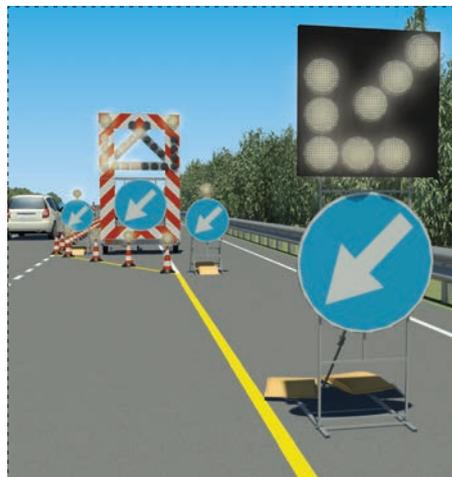

Possibility to personalize the kit according to different norms, reliability warranty of the control unit and high luminosity LED lenses. Practical to assembly, reduced size.

technical
datasheet

	Certifications: in compliance with UNI EN 12352		Power supply: 12 V _{dc}		On/off switch: outside
	Light source: nr. 23 of 200 mm optics + nr. 2 of 300 mm optics		Type of battery: 180 Ah		Dimensions (H / L / W): 60 x 40 x 48 cm
	Light emission: yellow (amber)		Consumption: minimum 25 mA maximum 16,5 A		Weight: 15,2 kg
	Luminous intensity: 200 mm Class L8H 300 mm Class L9M		Luminous intensity regulation: variable intensity depending on ambient light		Temperature: -15 °C - +85 °C

Code	Description
204200252	Kit for warning trailer 23 led lights ds200 + 2 led lights 300 mm + Control unit

Flashing Light "Bi-Color Led Light diameter 200 mm"

In One **Light** Two **Colors** available

Description:

New special model 200 mm led light projected and designed for specific application of luminous signalization in work zones. In the same lamp the possibility to choose the red light for prohibition or amber light for warning. The luminous source is made by 120 amber leds and 120 red leds with transparent lens. It is possible to have 2 models with or without orange housing according to the specific application. The flat model

can be applied in any type of surface, steady support or mobile with 3 simple fixing screws.

Strengths:

Using a remote control from the master light you can choose the light colour, the flashing mode and if you have a master and slave light also the mode: synchro or alternate.

The reducing thickness permits to the light to be mounted in any surface and the presence of 120

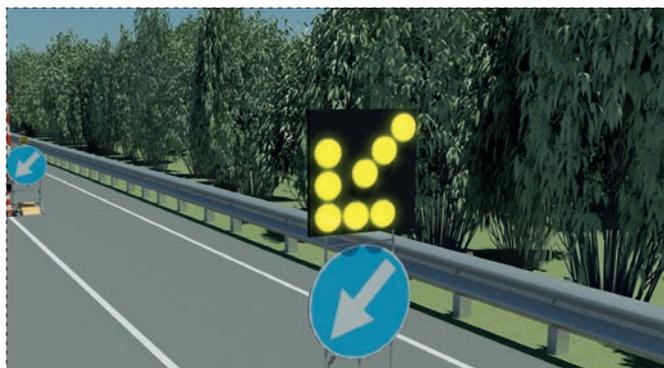

leds for each colour guarantee the maximum efficiency all in one light.

201900524	Slave light 200 mm bicolor

Flashing Light Evo "Led optic Ø 100 mm"

Description:

The new Evo Led light is mainly used to warn the drivers about a danger situation or a work zone where they need to pay particular attention.

The new design of the led light permits to mount it in any support and the special seal permits to fix the 2 parts of the light and protect it against any weather conditions.

Strengths:

It is easy to install and to dismount, useful in steady or mobile installation. The thin orange housing grants protection and an easy mounting. Easy to install also in existing signs, grant high brightness and low consumption permitting a great visibility of the warning signs also from great distance.

With a special remote control (optional) it is possible to select 3 different flashing mode.

technical datasheet

flashing light

	Certifications: in compliance with UNI EN 12352		Luminous intensity: Class L2H		Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah		Dimensions (H / L / W): 14 x 14 x 3 cm
	Light source: nr. 32 high intensity led		Power supply: 12 / 24 V _{dc}		Duration: standard flash mode 250h / 550h / 1300h / 2450h tri-flash mode 500h / 1100h / 2700h / 4800h		Weight: 0,25 Kg
	Light emission: yellow (amber)		Twilight: on request		Photovoltaic kit: 20 W		Temperature: -15 °C - +85 °C

slave light - steady light

	Certifications: in compliance with UNI EN 12352		Luminous intensity: Class L2H		Consumption: 200 mA		Dimensions (H / L / W): 14 x 14 x 3 cm
	Light source: nr. 32 high intensity led		Power supply: 12 V _{dc}		On/off switch: absent		Weight: 0,25 Kg
	Light emission: steady Yellow (amber)		Type connection to the battery: with 1mm ² cable		Twilight: absent		Temperature: -15 °C - +85 °C

Code	Description
201900414	EVO Slave light 100 mm

Flashing Light

"Led optic diameter 100 mm"

Description:

They can be applied in any type of surface, steady or mobile support with 3 simple fixing screws. Mainly used to signal important situations or to signal the presence of working zones.

Strengths:

The device guarantees an high brightness with a reduced thickness and size. Easy to install and to remove on the different supports. The presence of 32 LEDs guarantee the maximum efficiency.

New!
it can be fitted with an optional remote control that ensures high versatility allowing to choose the most suitable type of flash (SEE PAG. 32)

201900420	100 mm double flashing light alternate

Flashing Light "Kit of 3 Led lights 100 mm for sign"

Description:

The kit with 3 LEDs lenses can be applied on signals near working zones in order to warn the driver of a presence of works.

Strengths:

Easy to install on existing road signs. The device guarantees a high brightness with a reduced thickness and size.

Easy to install and to remove on the different supports. The presence of 32 LEDs guarantee the maximum efficiency.

	Certifications: in compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		Switch on/off: absent
	Light source: three optics with 32 high intensity leds		Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah		Dimensions (H / L / W): with cables included 20 x 20 x 20 cm
	Light emission: yellow (amber)		Duration: 120h / 270h / 680h / 1230h		Weight: 1 Kg
	Luminous intensity: Class L2H		Twilight: on request		Temperature: -15 °C - +85 °C

Evo Flashing Light

"Alert Box One with Led light Ø 200 mm and Solar Panel 5W"

New

Description:

The Pedestrian Alert system is designed to enhance road safety by providing early warning of dangerous situations and clearly signaling the presence of pedestrian crossings. Its adaptable kit design allows quick installation on any traffic sign pole, ensuring maximum versatility and ease of use. The unit is supplied with a high-visibility flash mode to guarantee immediate attention in all conditions.

Strengths:

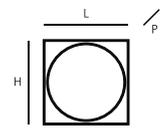

High brightness and low power consumption thanks to the flash blinking mode. The system is easy to install, lightweight, and features a user-friendly interface. Excellent speed-deterrent effect and ensures reliable performance, increasing road safety.

	Certifications: Optics in compliance with UNI EN 12352		Power supply: 12 V _{dc}
	Type of battery: photovoltaic panel battery 7Ah		Box: metallic black painted box with brackets
	Light source: 1 led optics with flashing or triflash luminous mode		Dimensions: 60 x 40 x 33 cm

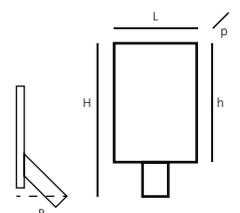

Box

Material: Powder-coated aluminum, black color
Box dimensions:
 W 235 × H 235 × D 115 mm
Maximum overall dimensions:
 W 240 × H 240 × D 165 mm
Weight: 3.9 kg

Photovoltaic Module

Module dimensions:
 W 185 × H 230 × D 25 mm
Kit with support dimensions:
 W 185 × H 370 × D 225 mm
Weight: 1.97 kg
Pole support: Ø 60 mm

Flashing Light

"Led optic Ø 300 mm L9H"

IP 65/67

Description:

The new 300 mm L9H Led Light with only 31 leds is mainly used to warn the drivers about a danger situation or a work zone, where they need to put particular attention. Manly used also as a component to mount on a trailer grants very high brightness with low consumption. The new light with only 31 leds is able to reach the L9H level of brightness. With the new design the led light can be mounted in any support and the special seal

permits to fix the 2 parts of the light and protect it against any weather conditions.

Strengths:

It is easy to install and to dismount, useful in steady or mobile situations where it is required very high brightness. The thin orange housing grants protection and an easy mounting. Easy to install also in existing signs, the lamp grants high brightness and low consumption permitting

a great visibility of the warning signs also from great distances. With the special remote control (optional) is possible to select 3 different flashing mode.

Flashing Light

"Double Led optics Ø 300 and Ø 340 mm"

Flashing light synchronous / Flashing light alternate

Description:

They can be applied in any type of surface, steady support or mobile with 4 simple fixing screws. Mainly used to signal important situations or the presence of working zones, using the case the application is on poles.

Strengths:

The device guarantees a high brightness with a reduced thickness and size without the case. Easy to install and to remove on the different supports. The presence of 232 LEDs guarantee the maximum efficiency.

Synchronous

	Certifications: In compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		Photovoltaic kit: standard 150W / tri-flash 50W
	Light source: two optics with 232 high intensity leds		Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah		Dimensions (H / L / W): with cables included 34 x 34 x 4,5 cm 34 x 34 x 22 cm (with moplén case)
	Luminous intensity: Class L9M		Duration: standard flash mode 15h / 40h / 100h / 190h tri-flash mode 35h / 85h / 210h / 380h		Weight: with cables included 3,1 Kg 6,9 kg (with moplén case)
	Light emission: yellow (amber)		Twilight: on request		Temperature: -15 °C - +85 °C

Alternate

	Certifications: in compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		Photovoltaic kit: standard 110W / tri-flash 50W
	Light source: two optics with 232 high intensity leds		Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah		Dimensions (H / L / W): with cables included 34 x 34 x 4,5 cm 34 x 34 x 22 cm (with moplén case)
	Luminous intensity: Class L9M		Duration: standard flash mode 10h / 22h / 60h / 110h tri-flash mode 35h / 85h / 210h / 380h		Weight: with cables included 3,1 Kg 6,9 kg (with moplén case)
	Light emission: yellow (amber)		Twilight: on request		Temperature: -15 °C - +85 °C

Code	Description

Flashing Light "Bike Light"

Description:

Led Bike Light diameter 300 mm has been designed to show bicycles lanes. It is made by 132 green color LED that designed the symbol of a bicycle. The product is available in three versions: only board to mounted in exiting sign,

with orange housing to mount on a pole with a thin transparent light. It is a very good solution to warn the driver of the presence of the bicycle lane.

Strengths:

Easy to install, low consumption, high visibility at night.

 Photovoltaic kit: 50 W	 Temperature: -15 °C - +85 °C	 Type of Batteries: 18Ah / 40Ah / 100Ah / 180Ah	 Dimensions (H / L / W): 23 x 22 x 4 cm 23 x 22 x 16 cm (with moplén case)
 Light source: nr. 132 green leds	 Power supply: 12 / 24 V _{dc}	 Consumption: Standard mode 41 mA @12Vdc Flash mode 18 mA @12Vdc Tri-flash mode 27 mA @12Vdc	 Weight: 1,16 Kg 3,56 kg (with moplén case)

technical datasheet

Code	Description
201900468	Bike Green Led Light 300 mm

Led Light Ø 200 mm with Arrow/Cross

Led warning lights for special applications

Description:

Bicolor Led light with 200 mm diameter used to be mounted in signs for special applications. The light is composed by 40 high intensity green leds to create the cross and by 48 red color leds to create the arrow. The product is available in 3 versions: only the board to be

mounted in existing signs, with or without the orange housing depends on the application the customer needs. It is possible to change the configurations with a special remote control.

Strengths:

Simple to install, low consumption.

 Dimensions: Optic diameter 200 mm	 Light source: Arrow shape 40 green leds Cross shape 48 red leds	 Power supply: 12 V _{dc}
 Consumption: Red average 240 mA Green average 280 mA	 Type of power: network; photovoltaic panel; public network	 Temperature: -20 °C - +85 °C

205500265	Remote control to change arrow/cross configuration

Flashing Light "Led optics diameter 200 mm Wi-Fi"

Description:

The 200 mm led light features Wi-Fi programming for easy setup, allowing you to adjust settings, change flash patterns, and synchronize devices.

Strengths:

No software is required to program the devices or ac-

cess their features. A simple dashboard page has been developed, allowing full control of all functions. The system is designed to be managed from any Wi-Fi-enabled device using a standard web browser, such as a computer, tablet, or smartphone.

	Certifications: In compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		Twilight: on request
	Light source: two optics with 120 high intensity leds		Type of Batteries: 18Ah/40Ah/100Ah/180Ah		Photovoltaic kit: standard 110 W tri flash 50 W
	Light emission: yellow (amber)		Duration (synchronous): standard flash mode 19h / 40h / 100h / 190h; tri-flash mode 55h / 120h / 310h / 570h		Dimensions (H / L / W): 23 x 23 x 12 cm
	Luminous intensity: Class L8H		Duration (alternate): standard flash mode 15h / 35h / 95h / 165h; tri-flash mode 50h / 120h / 310h / 565h		Weight: with cables included 1,7 Kg

Code	Description
201901318	Master light 200 mm Wi-Fi
201900180	Slave light 200 mm

LM Check

Description:

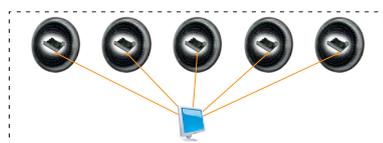

LEDs optics control card that calculating the level of absorption of the optics can determine anomalies on the led without the direct control of the operator. Especially useful in difficult areas such as: in the galleries and in isolated streets.

Strengths:

Possibility of remote control of the lamp, very useful when is not possible to send personnel to check the working of the luminous systems.

	Power supply: 12 V _{dc}		Transmission interface: RS485
	Consumption: 20 mA		Dimensions (H / L / W): 5 x 6,7 x 1,7 cm
	Twilight: no		Weight: 0,5 Kg

Code	Description
204500174	LM Check

Remote Control for Led optics

Description:

It allows to program the LEDs flashing lights deciding the type of flashing, the synchronization (between master and slave) to use. It also permit to choose the twilight or the backlight function.

Strengths:

Minimize of the inventory. Availability to program by your self the optics according to the specific need.

	Power supply: 9 V _{dc}		Dimensions (H / L / W): 14 x 6 x 3 cm
	Type of Batteries: nr. 1 / 6LR61		Weight: 0,1 Kg
	On/off switch: outside		Temperature: -15 °C - +85 °C

Code	Description
204500191	Remote control for led optics

Led Traffic Light with cable

Description:

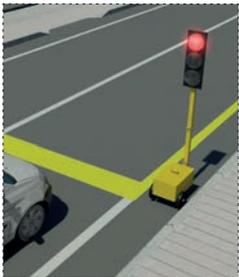

The system consists of 2, 3 or 4 mobile trolleys completed with a lantern with 3 Ø 200 LED lights and connected together by cables. It is used in long-term work zones or in long-term restrictions created to change the traffic flow.

Strengths:

The multifunctional digital control unit can manage inputs from remote control or external sensors and connect remotely via GSM connection (optional) the traffic lights. The system allows you to connect up to 4 traffic lights together using the latest generation control units, the system must be connected with cables. The presence of the connection cable grants a perfect and lasting synchronization of the system.

	Units number: two		Times: 1 - 999 sec		Alarms: lamps, battery		Dimensions (H / L / W): box 70x80x50 cm
	Luminous intensity regulation: variable intensity depending on ambient light		Power supply: 12 V _{dc}		Autonomy: (with battery of 100Ah) 7 days (168 hours)		Weight: 46 Kg
	Light source: led lantern		Connection type: quartz synchronization with cables		Maximum distance: max lenght of cables 1000 mts		Temperature: -20 °C - +70 °C

Led Traffic Light

Description:

The device is composed of two mobile foldable trolleys with traffic lights, it is mainly used in working zones in urban or suburban areas.

Out of the city center the device can be preceded by the warning signal "traffic light" with yellow flashing light.

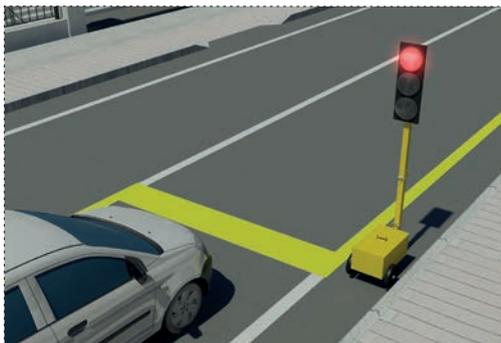

Strengths:

Practical to use, the foldable model can guarantee a reduced size during the carrying phases. The LED lenses guarantee high brightness with low consumption and allows to use one battery of 100 Ah. The light is automatically regulated in order to improve the visibility during the night.

New wheels and adjustable pole that give to the device a greater strength.

QM3rDW Control Unit Wi-Fi

New

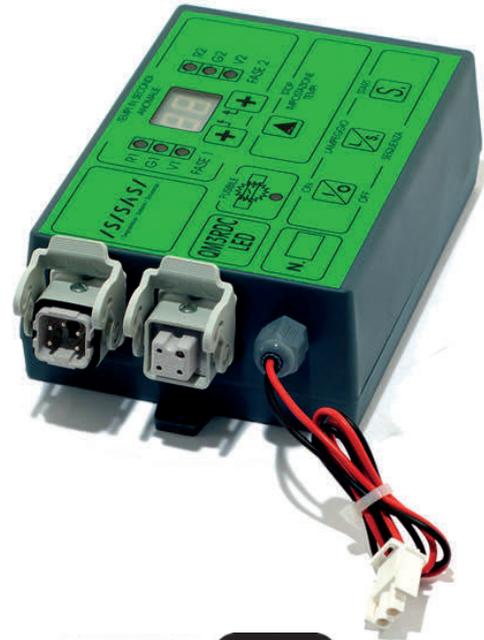

Description:

Traffic light control unit, thanks to its versatility it can be used with both incandescent and led lamps in systems with and without connecting cables. Suitable for any road construction site where safety and reliability are required.

Strengths:

The most common use is close to construction sites to facilitate the work of the workers, or when it is useful to convey traffic in both directions in a single lane as in case of landslides, road accidents, etc. The QM3rDW control unit can operate both in quartz mode then independently without physical connection between the two control units or by cables.

With cable mode you can use the interaction between systems to activate alarms in case of anomalies. The QM3rDW control unit allows both the use of LED lanterns and traditional 12V bulb lanterns APP directly from your smart-phone. Possibility of setting all the different modes and functions by WI-FI connection.

	Max phases: two 4 led traffic lights		Times: 1 - 495 sec		Alarms: Lamp, battery, communication
	Light source: led or traditional lantern		Power supply: 12 V _{dc}		Autonomy: (100 Ah battery) 168 hours
	Dimensions (H / L / W): 8,4 x 17,5 x 12,5 cm		Weight: 0,380 Kg		Temperature: -15 °C - +85 °C

Led Traffic Light "Count Down"

Description:

The device is composed of two mobile foldable trolleys with traffic lights, it is mainly used in working zones in urban or suburban areas.

The Count Down counts the remaining seconds to change the sequence from red to green and vice-versa.

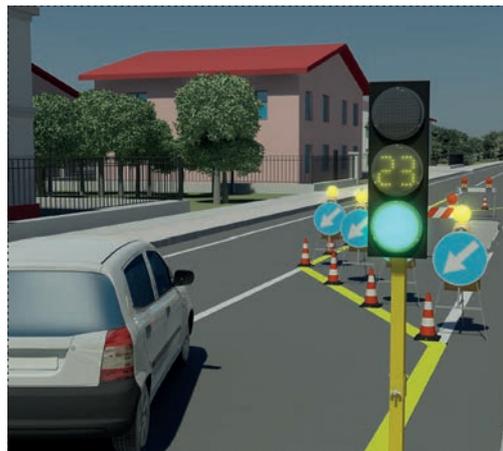

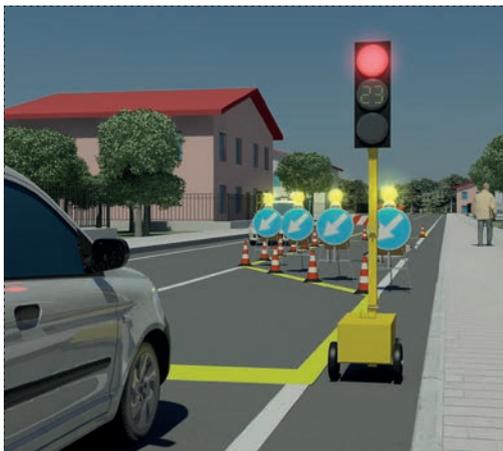

Strengths:

Practical to use, the foldable model can guarantee a reduced size during the carrying phases. The LED lenses guarantee high brightness with low consumption and allows to use one battery of 100 Ah. The light is automatically regulated in order to improve the visibility during the night.

New wheels and adjustable pole give to the device a greater strenght.

	Units number: two		Type of Batteries: batteries - network		On/off switch: internal		Dimensions (H / L / W): box 70 x 50 x 80 cm
	Luminous intensity regulation: variable intensity depending on ambient light		Power supply: 12 V _{dc}		Consumption: avarage 1,1A max 1,6A		Weight: 46 Kg
	Light source: led lantern (yellow 2 ciphers)		Connection type: quartz synchronization		Maximum distance: depending on travel time		Temperature: -20 °C - +70 °C

Multifunction Control Unit

Description:

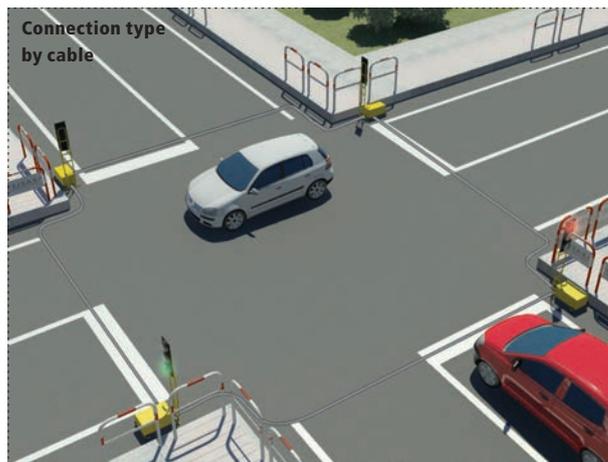

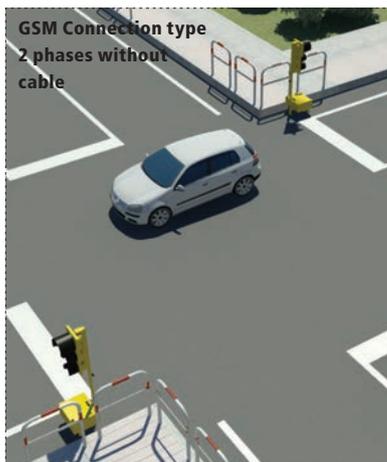

Control unit for traffic lights, thanks to its versatility, can be used either with lamps or LED, in the systems with or without cables. Its use is indicated in any working zones when is required safety and security.

Strengths:

The device allows to control up to 8 traffic lights with 4 different phases, the **GSM** module permits the programming and the control of the traffic light and the managing of warning messages via sms to control eventual problems. Thanks to the radar connection is possible to raise the time of the green light if there are more vehicles transiting in one direction, in order to avoid queues.

	Max phases: four		Times: 1 - 999 sec		Alarms: Lamp, battery , communication		Dimensions (H / L / W): 6,5 x 22 x 12,5 cm
	Max repeaters: four		Power supply: 12 V _{dc}		Autonomy: (100 Ah battery) 7 days		Weight: 0,5 Kg
	Light source: led or traditional lantern		Connection Type: quartz synchronization (2 phases) and by cable / GSM		Maximum distance: Maximum cable length 1000 m		Temperature: -15 °C - +85 °C

Flashing Light "E-one Radio Sincroled"

Fresnel Lens

**L8G
Brightness**

Description:

It allows to create a luminous sequence to warn the vehicles of a deviation or a lane change. It is mainly used in highways working zones and for supplementing normal signals. The device can be composed by two lamps or more. The synchronization is made through the sequential activation of the

flashing lights. It has 4 luminous levels that adapt themselves automatically to the ambient light.

technical datasheet

Flashing Light "E-ONE STAR Radio Sincroled"

Yellow Fresnel Lens

**L8M
Brightness**

Strengths:

Thanks to an innovative Fresnel lens, the device can guarantee an high luminous emission visible even from great distances. Because of the only one LED present, the device has a very low consumption. It is very easy to install, thanks to the small dimensions and to the absence of cables.

technical datasheet

E-one Radio Sincroled

	Certifications: In compliance with UNI EN 12352		luminous intensity: Class L8G		Type of battery: nr. 2 4R25 batteries of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm

Flashing Light "Radio Sincroled" IoT

Description:

The device allows to create a luminous sequence to signal to the vehicles a lane restriction or a lane changing. It is mainly used in highway working zones, supplementing the normal signals. The synchronization is made via radio through the sequential switching of the flashing lights.

The New Sincroled Radio IoT is equipped with LORA module, it can synchronize together the different flashing lights, and it can also send malfunctions alert messages. (Hubradio).

Strengths:

Quick installation thanks to the absence of cables and to its small dimensions. The lamp is equipped with LED light at high brightness (L8H) and low consumptions. It is possible to choose different modality of flashing and also to control the battery level. The lamps synchronization is unlimited in order to guarantee its use even in long lasting working zones.

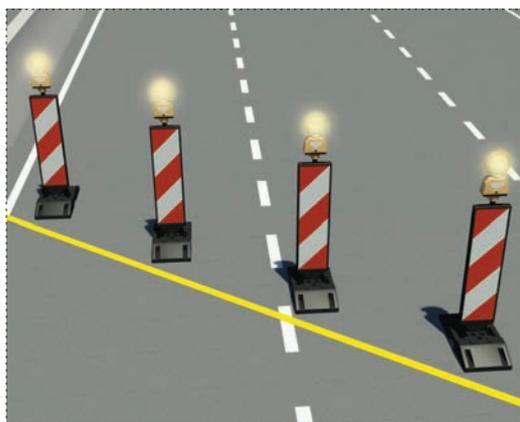

The Hub detects all the communication between the radio devices and the information can be sent by GPRS to the WEB

portal to collect, process and display the data.

All the devices are monitored and controlled so to grant a prompt reporting of any malfunctions or road accidents to the personnel in charge who will be able to promptly restore construction site safety.

	Certifications: In compliance with UNI EN 12352		luminous intensity: Class L8H		Type of battery: nr. 2 4R25 batteries of: 7 Ah / 25 Ah / 45 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm
	Light source: 120 led amber		Power supply: 12 V _{dc}		Duration: 44 h / 160 h / 280 h		Weight: 0,7 Kg
	Light emission: sequential yellow (amber)		Luminous intensity regulation: variable intensity depending on ambient light		On/off switch: external		Temperature: -20 °C - +85 °C

Flashing Light E-ONE STAR IoT 24 +

New

Description:

The ONE Star IOT 24+ Yellow is a single-sided LED flasher designed for temporary road signaling and continuous 24-hour operation.

It features an integrated photovoltaic panel that increases the autonomy of 4R25 non-rechargeable batteries, reducing maintenance needs. The L8M Led light ensures high visibility even in bright daylight conditions.

Thanks to radio synchronization and low-power LoRa communication, multiple devices can operate in sequence or as a barrier over long distances. The system supports remote monitoring

via the optional HubRadio module with data transmission through GPRS.

Strengths:

Continuous 24/7 operation with high visibility L8M Led light, effective in daylight.

Integrated solar panel for extended battery life, radio-synchronized operation for dynamic signaling.

Long-range, low-power LoRa communication, optional remote monitoring and fault notifications.

Quick installation and easy maintenance.

202000131	E-ONE STAR IoT 24 + flashing light Ø 230

Flashing Light Radio Sincroled IoT 24+

New

Description:

The system creates a sequential lighting pattern to warn vehicles of lane narrowing or carriageway shifts. It is designed for motorway work sites as a complement to standard road signage. The warning lights are synchronized via radio, allowing sequential activation.

Strengths:

Thanks to its compact size and wireless design, installation is quick and easy. The lamp features high-brightness LED (L8H), multiple flashing modes, and

battery level monitoring. Radio synchronization enables reliable use even in long-duration road works.

The LED construction warning light with IoT radio synchronization is designed for temporary road signaling and continuous 24/7 operation. The integrated photovoltaic panel significantly extends the life of the non-rechargeable 4R25 batteries, reducing replacement frequency and making the system ideal for long-term use in demanding operating conditions.

Flashing Light "Sequential System with Cables"

Description:

The device is made of homologated LED lamps (master and slave) with via cable synchronization, without electronic control unit. The module permits to realize a luminous sequence of different length in order to warn the drivers of a lane restriction or a roadway changing. Mainly used in highway working zones.

Strengths:

Thanks to the master light it is possible to set up 3 different speeds for the luminous sequence, the activation of twilight and guide light. It is possible to configure the system with only slave lights, if the functions of the master are not required. Safe lamps synchronization thanks to the cables. It is possible to apply the lamps on different supports thanks to the rear integrated bracket.

Flashing Light "E-one Sequential System with Cables"

Fresnel Lens

Description:

The device is made of homologated E-one yellow led lamps via cable synchronization, without electronic control unit. The module permits to realize a luminous sequence of different length in order to warn

the drivers of a lane restriction or a roadway changing. Mainly used in highway working zones.

Strengths:

The system is configured with only slave lights, up to 30 lamps in a row. Because of the innovative Fresnel lens, the device can guarantee a high luminous emission visible even from great distances. Thanks to the only

one LED, the device has a very low consumption. Safe lamps synchronization thanks to the cables. It is possible to apply the lamps on different supports thanks to the rear integrated bracket.

	Certifications: In compliance with UNI EN 12352		luminous intensity: Class L8G		Type of battery: 100 Ah		Dimensions (H / L / W): 36,5 x 20 x 9,5 cm
	Light source: 3W amber led		Power supply: 12 V _{dc}		Duration: 600 h *5 lights kit		Weight: Slave 1,4 kg (with 12 m cable)
	Lenses: Fresnel lens		Twilight: yes		On/off switch: absent, using battery cables		Temperature: -15 °C - +85 °C

technical datasheet

Directional Led Panel "60x60 cm - 8 Led optics"

(Ø 100 mm)

Description:

Used in steady or mobile working zones, they can be applied on stands, on poles or fixed on vans, trailers and operative machines. Thanks to the

rear swivel is possible to realize a right or left arrow.

Strengths:

The structure is made of aluminum that guarantees a very good resistance to the hurts and to the weathering. High luminous LED lenses. Light sensor for auto brightness.

	Certifications: in compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		On/off switch: absent
	Light source: nr. 8 leds optics of ø 100 mm		Type of battery: 40 Ah / 100 Ah / 180 Ah		Dimensions (H / L / W): 60 x 60 x 13 cm
	Light emission: yellow (amber)		Duration: 120 h / 300 h / 520 h		Weight: 6 Kg
	Luminous intensity: Class L2H		Twilight: no		Temperature: -15 °C - +85 °C

203400014	60x60 cm directional led panel ø 100 mm

Directional Led Panel "70x70 cm - 13 Led optics"

(Ø 100 mm)

Description:

Used in steady or mobile working zones, they can be applied on stands, poles or fixed on vans, trailers and operative machines. Thanks to the presence

of 13 lenses is possible to realize: right arrow, left arrow, X for danger.

Strengths:

The structure is made of aluminum that guarantees a very good resistance to the hurts and to the weathering. High luminous LED lenses. Light sensor for auto brightness.

	Certifications: in compliance with UNI EN 12352		Power supply: 12 / 24 V _{dc}		On/off switch: outside
	Light source: nr. 13 leds optics of ø 100 mm		Type of battery: 40 Ah / 100 Ah / 180 Ah		Dimensions (H / L / W): 70 x 70 x 13 cm
	Light emission: yellow (amber)		Duration: 120 h / 300 h / 520 h		Weight: 8,2 Kg

Road Flag Mover

Description:

Provided with 200mm, 300 mm optics or both (200mm and 300mm) the flag mover is used close or inside the work zones in highways to advise the users of the roads about a presence of works, warning them to slow down and to be careful. The flag mover has been designed to make configurations for deviations on the right or on the left.

Strengths:

Thanks to the foldable structure, two wheels and the handle for the transport, the movement operations and the installations in the work zones are easy and increase the security of the workers. High visibility and low energy consumption are granted by using led lights. High reflective orange fluorescent flag for high visibility.

	Certifications: In compliance with UNI EN 12352		luminous intensity: Ø 200 mm Class L8H Ø 300 mm Class L9M		Type of battery: 100 Ah / 180 Ah		Dimensions (H / L / W): box 112 x 53,5 x 51 cm
	Light source: 200 mm optics 120 led amber 300 mm optics 232 led amber		Power supply: 12 V _{dc}		Duration: optic Ø 200 mm: 42 h / 76 h optic Ø 300 mm: 40 h / 72 h optic Ø 200+300 mm: 38 h / 69 h		Weight: 26,5 Kg

Barrier with 5 Led optics

Description:

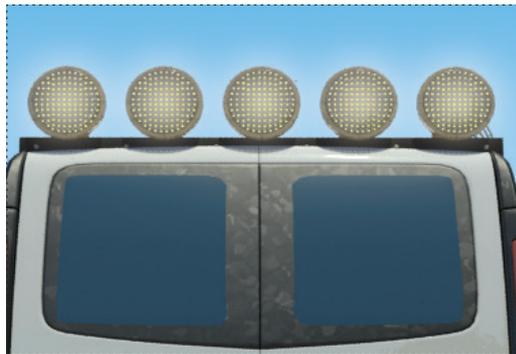

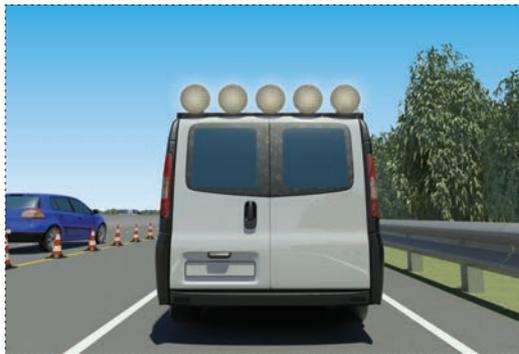

Mainly used for applications on emergency vehicles or on working machines, its purpose is to catch the driver's attention for a dangerous situations, a lane deviation or lane changing.

Strengths:

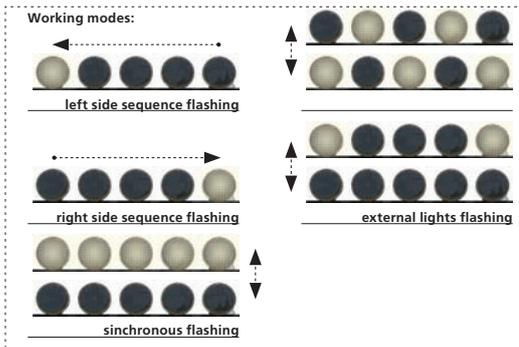

Handled by the driver with a remote control. Possibility to choose different configurations of the high brightness LED lights, depending on the operator needs. Easy to install or to remove on any kind of vehicle.

	Certifications: In compliance with UNI EN 12352		luminous intensity: Class L8H		Type of battery: 12 V _{dc} vehicle battery		Dimensions (H / L / W): 140 x 28 x 17 cm
	Light source: five optics with 120 led amber		Power supply: 12 V _{dc}				Weight: 9,5 Kg
	Light emission: yellow (amber)		Luminous intensity regulation: variable intensity depending on ambient light		On/off switch: external		Temperature: -15 °C - +85 °C

Warning Trailers

Description:

Location mobile signal placed on a trailer pulled by a vehicle. It is mainly used for signaling highway working zones. Equipped with LED lights and with arrow signal adjustable to the free side, its purpose is to signal to the driver the deviation to follow. Our standard trailer is composed by 23 Ø 200 mm led lights and 2 Ø 300 mm to show the different configurations: arrow right/arrow left/triangle/double arrow and right or left sequence. The led lights are mounted in a structure made

of aluminum plate covered by white/red HI tape. All the structure is made by galvanized steel: the loading compartment is in zinc plated material and it is composed by 3 parts: 1 closed space for the batteries, 2 open spaces where is possible to place different tools. It is possible to have the trailer with or without brakes. Equipped also with manual blue arrow sign. The maximum speed in closed position is 80 km/h while in the operating position is 25 km/h.

Strengths:

High visibility, strong structure resistant to the hurts, vain used to transport various tools.

	Certifications: in compliance with UNI EN 12352		Power supply: 12 V _{dc}		On/off switch: outside
	Light source: nr. 23 of 200 mm optics + nr. 2 of 300 mm optics		Type of battery: nr. 2 batteries 180 Ah		Dimensions (H / L / W): closed: 222,2 x 220 x 250 cm
	Light emission: yellow (amber)		Consumption: minimum 25 mA maximum 16,5 A		Weight: 560 kg
	Luminous intensity: 200 mm Class L8H 300 mm Class L9M		Luminous intensity regulation: variable intensity depending on ambient light		Temperature: -15 °C - +85 °C

h 30 cm Rubber Cones

High Intensity Grade

2 Bands

(High Intensity Grade)

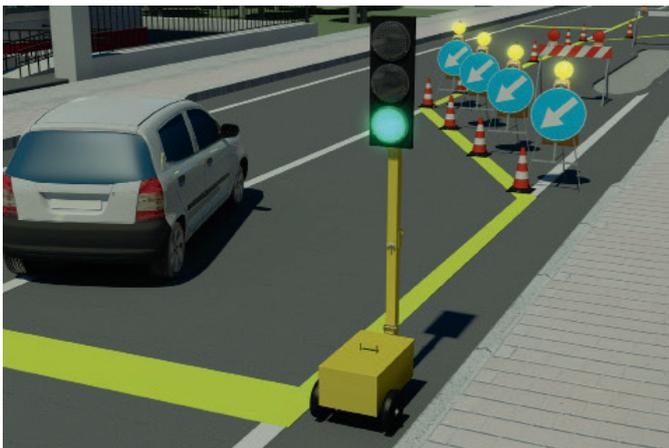

Description:

They are used to show working zones in parking and private areas.

Strengths:

High elasticity, resistant to the crushings, anti-aging painting, the application of the bands increase the visibility.

	Dimensions: H: 30 cm Base: 23 x 23 cm		Construction materials: high elasticity vulcanized rubber product
	Weight: 0,9 Kg		External surface treatments: anti-aging red painting / H.I. tape

Code	Description	Pallet

Flexible EVA Defleco

High Intensity Grade

Description:

It is used to delimit opposite or parallel working zones in suburban streets and highways during the night.

Strengths:

Easy to install and to remove thanks to the adhesive. High resistant material.

	Dimensions: Body (H/L/W) 33 x 11,5 x 1,5 cm Base (H/L/W) 2,5 x 21 x 15 cm		Construction materials: Eva body + rubber base
	Weight: total 1 kg		External surface treatments: 6 inserts H.I.

Code	Description	Pack	Pallet
104730021	Flexible EVA defleco with 6 inserts High Intensity Grade	25 pcs	12 packs

Flexible rubber Defleco

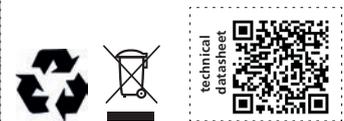

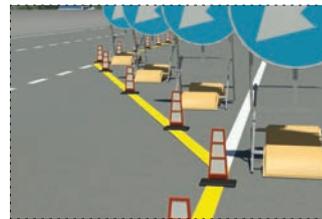

High Intensity Grade

Description:

It is used to delimit opposite or parallel working zones in suburban streets and highways during the night.

Strengths:

Easy to install and to remove thanks to the specific adhesive. It is resistant to hurts and crushing.

	Dimensions: Body (H/L/W) 33,5x 11,5 x 4,5 cm Base (H/L/W) 2,5 x 21 x 15 cm		Construction materials: high elasticity vulcanized rubber product
	Weight: total 1,5 kg		External surface treatments: anti-aging red painting of the delineator with 6 inserts H.I.

Code	Description	Pack	Pallet
104630621	Flexible rubber defleco with base 6 insert High Intensity Grade	50 pcs	12 packs

Glue

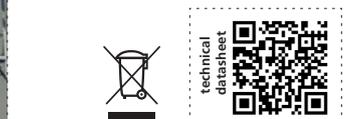

Glue used to fix the delineators on the ground

Description:

The glue is used to fix the delineators on the ground.

Strengths:

The specific adhesive permits an easy installation and removal of the item.

	Dimensions: 23 x 19 cm		Construction materials: tin can
	Weight: 4,75 kg		

Code	Description
19900005	Glue for road delineators

Road Barrier

110x200 cm

Description:

It is used to point out and to delimit working zones, deposits, pedestrian crossings, during events.

Strengths:

Removable and adjustable leg barrier, that guarantee stability to the ground, anti-slip attaches. Thanks to the lateral brackets is possible to join the barriers together. The white/red panel guarantees a major night visibility.

Road Barrier

110x250 cm

Description:

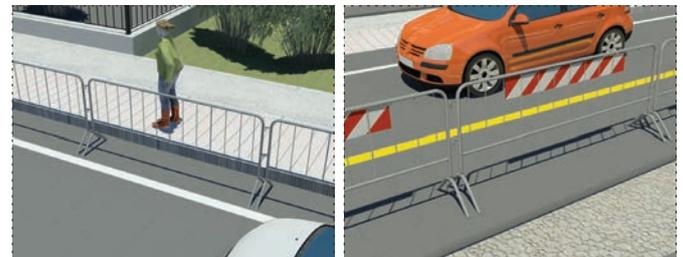

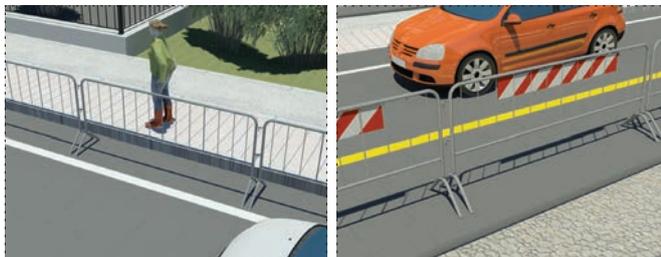

It is used to point out and to delimit working zones, deposits, pedestrian crossings, during events.

Strengths:

Removable and adjustable leg barrier, that guarantee stability to the ground, anti-slip attaches. Thanks to the lateral brackets is possible to join the barriers together. The white/red panel guarantees a major night visibility.

	Dimensions (H / L / W): barrier: 110 x 200 x 3 cm		Construction materials: iron
	Weight: 110x200 cm: without panel with legs 10 kg with panel with legs 12,3 kg		External surface treatments: hot galvanized

	Weight: 0,3 kg		External surface treatments: absent

Code	Description	Pack	Pallet
909033010	Orange empty bag with cap	50 pcs	10 packs

Orange bag with Sand

Description:

It is used to fix the stand on the ground, with sand inside.

Strengths:

Quick installation, resistant, ready to use.

	Dimensions (H / L / W): 8 x 58 x 39 cm		Construction materials: pvc
	Weight: 13 kg		External surface treatments: absent

Code	Description	Pallet
909033005	Orange bag with sand	50 pcs

Plastic Signs

Ecological

Light

Crush-proof

Strong

Long-lasting

technical
datasheet

Description:

Plastic signs with different dimensions and shapes are used to replace the standard signs in aluminum or steel in different applications to regulate the traffic flow. Easily to install thanks to their light weight, they are particularly Indicated in temporary work zones. They can be fixed in any supports with the standard brackets.

Strengths:

Weathering resistant, longer life than the standard sings.

Dimensions: Ø 60 cm thickness 4 mm		60 cm		Weight: 1,2 kg
Dimensions: side 90 cm thickness 4 mm		90 cm		Weight: 1,4 kg
Dimensions: 60 x 60 cm thickness 4 mm		60x60 cm		Weight: 1,5 kg

Code	Description

15 kg PVC Base

Description:

It is used to fix the panels to the ground.

Strengths:

It guarantees excellent stability of the signals. It is also easy to install.

	Dimensions (H / L / W): 11 x 50 x 40 cm		Construction materials: recycled PVC
	Weight: 15 kg		External surface treatments: no

Code	Description	Pallet
201800082	15 kg recycled PVC base	50 pcs

Safety Signal Panel

White / Red Engineer Grade 25x100 cm

Description:

Plastic delineator to be mounted in safety bases for application in road works area. EG tape applied on the body.

Strengths:

Quick installation, resistant, ready to use.

	Dimensions: 25 x 100 cm		Construction materials: Plastic
	Weight: 2,90 kg		External surface treatments: EG tape applied on the body

Code	Description
204200005	Safety signal panel

28 kg PVC Base

Description:

It is used to fix the panels to the ground.

Strengths:

Quick installation, resistant, ready to use.

	Dimensions (H / L / W): 13 x 75 x 37,5 cm		Construction materials: recycled PVC
	Weight: 28 kg		External surface treatments: no

Code	Description	Pallet
201800033	28 kg recycled PVC base	30 pcs

Stacking New Jersey

Description:

Modular element that permit to create: continuing barriers for traffic, delimitations of working zones, for dangerous zones, and private areas.

Strengths:

The product can be stacked and so there is a big reduction of cost of transport and warehouse space, UV resistant, hurt resistant, quick and easy filling, space for road signs and lamps.

	Dimensions (H / L / W): 60 x 100 x 40 cm		Construction materials: polyethylene
	Weight: 6,5 kg to fill with max 30 liters of water		External surface treatments: uv treatments

Code	Description	Pallet
909025011	Red new jersey (stacking)	36 pcs
909025012	White new jersey (stacking)	36 pcs

Pvc Pole

Description:

They are mainly used to delimit areas of restricted access, working zones, private zones. Fitted with white/red chain and the base.

Strengths:

Light, easy to install and to remove, resistant to the weathering.

	Box includes	6 PVC Bases 6 PVC Poles
--	---------------------	----------------------------

	Dimensions (H / L / W): pvc pole: 83 x Ø 4 cm base: 28 x 28 x 8,5 cm Total: 90 x 28 x 28 cm		Construction materials: plastics
	Weight: pvc pole: 0,2 kg empty base: 0,35 kg base with cement: 2,7 kg		External surface treatments: uv treatments

Base with cement:

It is used combining with the pole and the white/red chain. Resistent and ready to use.

Empty base:

It is used combining with the pole and the white/red chain. It must be filled with water or sand. Resistent and easy to transport.

Traffic Systems

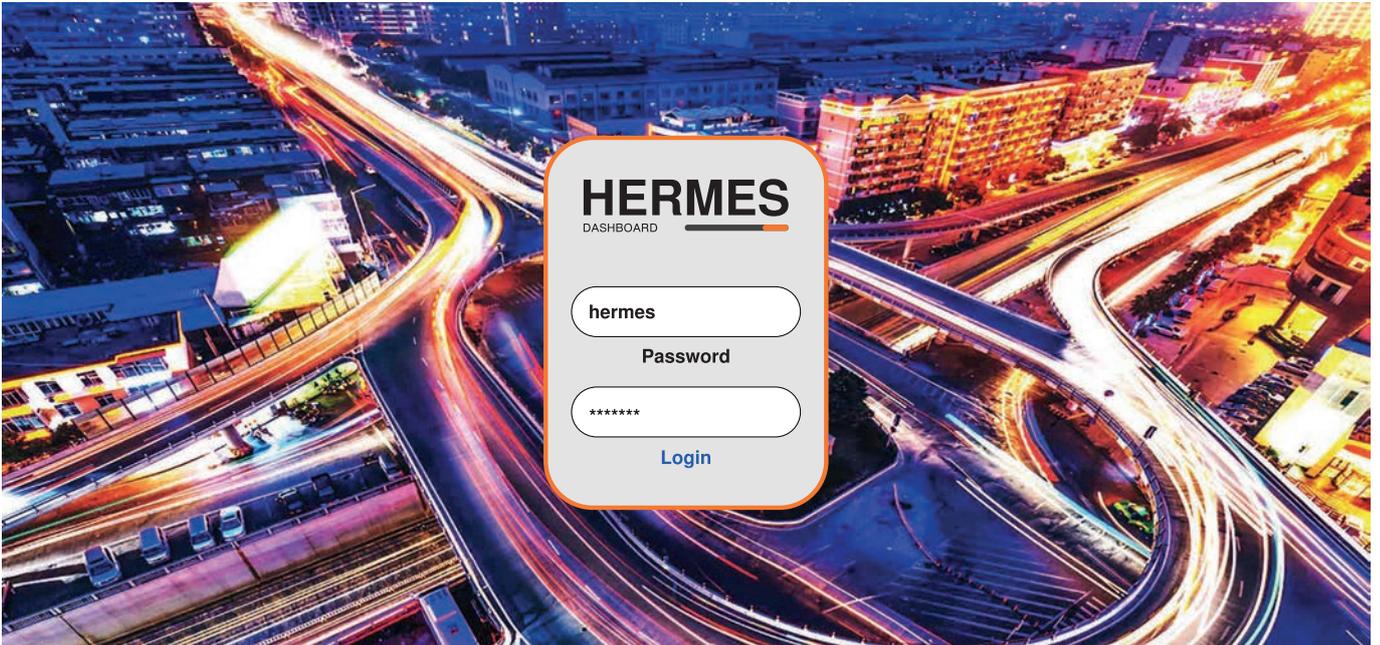

The current problems of both urban and extra-urban mobility require constant precise monitoring of traffic in order to understand and evaluate situations that can change its flow.

The use of advanced technologies, strict selection of materials, and an obsessive attention to the design phase are the foundation of the company's design philosophy and allow Sisas, to respond to every need of the highway signage sector.

To achieve its goals, Sisas offers both stand-alone solutions and complex ITS systems that, due to a design and construction philosophy based on a modular architecture, is completely scalable as our customers' needs increase.

HERMES Dashboard

Description:

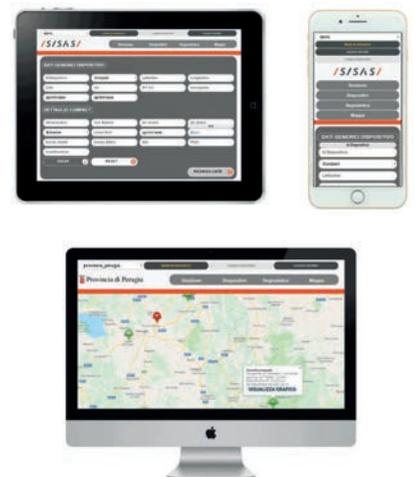

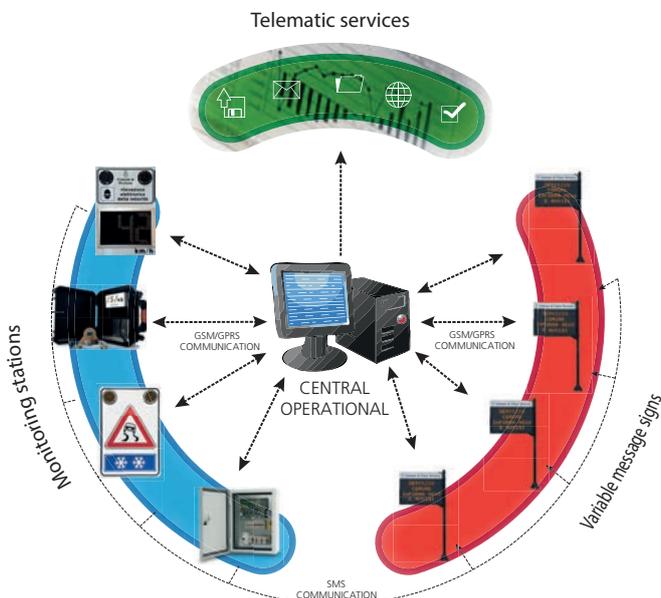

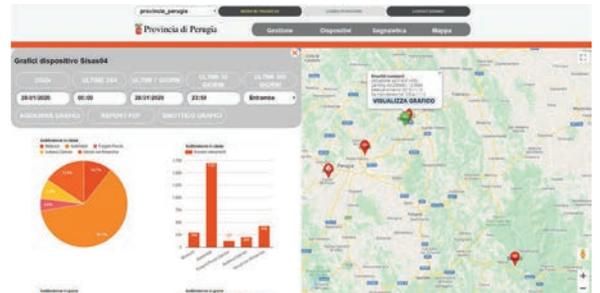

HERMES Dashboard is a customized platform where Sisas' customers can control and use all their connected devices, check and process the collected data and generate statistics which can highlight potential traffic flow issues. Using the IOT (Internet of Things), SISAS has developed HERMES Dashboard – an easy-to-use portal which constantly evolves to meet community needs.

Strengths:

Thanks to HERMES Dashboard, operational activity is simple, immediate, integrated, efficient, complete and localized.

Easy-to-read dashboard

All devices connected to the HERMES Dashboard are easily accessible to view and to modify their internal configuration with just a few clicks from the PC or smartphone, from anywhere and at any time.

IOT EcoSystem

Check uptime in a few seconds:

The collected data shows real time metrics allowing operators to monitor traffic flow and compare average vehicle speed with actual speed limits. The system lets you identify peak infraction times and yearly macro flow trend with the precision of one hour! The platform also allows data comparison for variance analysis.

Build custom widgets:

In addition to the information displayed, special needs and new functions can be developed based on the needs of the community. It is possible to highlight requests making HERMES Dashboard a customizable platform.

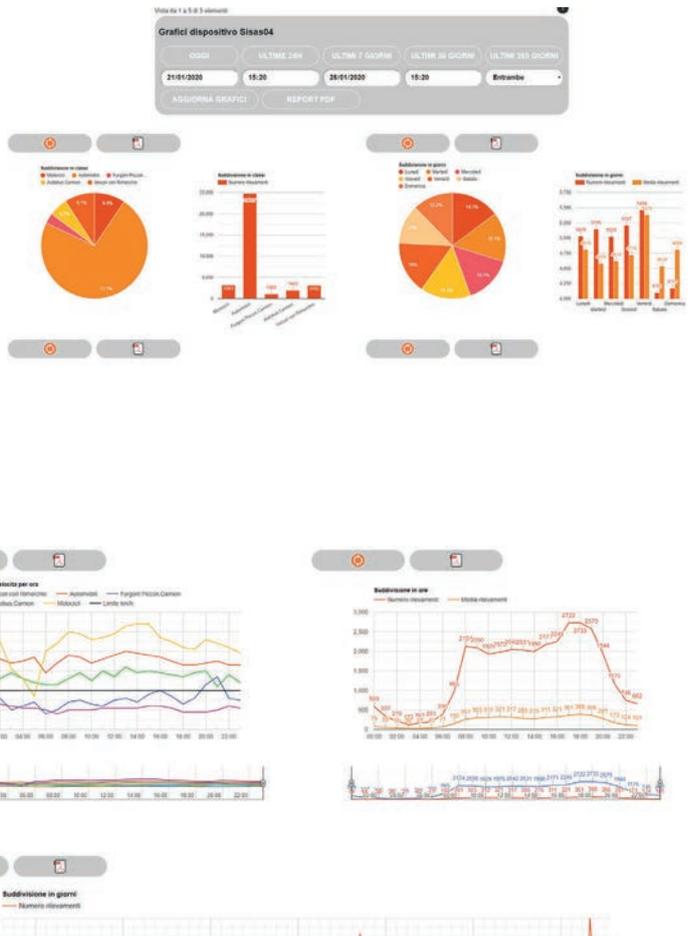

HERMES Dashboard grows with user needs, always keeps up with their requirements often even anticipates them!

Improve operational efficiency:

Physically monitoring and controlling the devices means being able to solve problems before they arise. The HERMES Dashboard platform also allows you to organize your devices into groups to be managed by specific people, guaranteeing and assigning complex responsibilities with ease.

Connect and use - Plug and Play:

With HERMES Dashboard it is possible to centralize your data making it easy to see and use. For example, you can download data in CSV format at any time and export it to any application such as Open Office or Excel or save it to your EDC database.

"Galileo" Radar Junior

Description:

Doppler effect system able to relieve vehicles even from great distances with two modalities: tracking and counting.

The radar can communicate with external systems through a serial port. The typical applications are with traffic counters and speed limit displays.

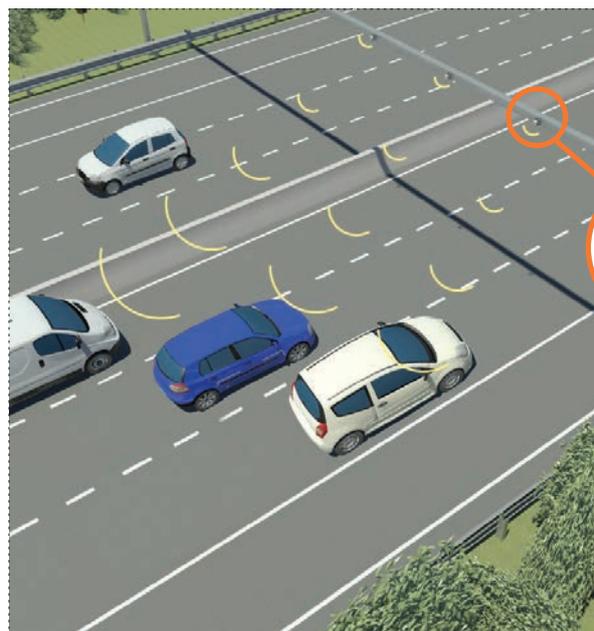

The heart of the system is the digital board that permits to memorize up to 2 Megabit of data. With small dimensions and ip66 container it offers an easy installation in all kind of supports.

Strengths:

Device with economic application used in the mobility sector. Range of speed 1-255 km, 5 classes of vehicles, internal clock for data memory, **custom-made configurations.**

	Power supply: 12 V _{dc}		Sensor: doppler radar 24Ghz		Temperature: -20 °C - +85 °C
	Communication interface: RS232 RS485		Dimensions (H / L / W): container 12 x 9 x 5 cm		Type of power: photovoltaic panel network public network
	Consumption: max: 0,075 A		Weight: 0,4 kg		

Code	Description
20400013	Galileo Radar Junior with cable

Monitoring "Compact 1000 Xtreme"

Description:

Mobile system, with integrated radar technology, used for monitoring and classification of the traffic, installation on a pole beside the road or using any type of support.

The system permits to identify vehicles in two lanes or even in two opposite directions. Mainly used for short monitoring, it generates statistical data files about the mobility such as: date, time, speed, counting vehicles and the classification of the traffic.

Optional communication modules for real-time data transmission, device configuration, and diagnostics: Wi-Fi, GSM/GPRS, Ethernet.

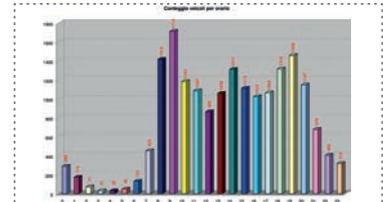

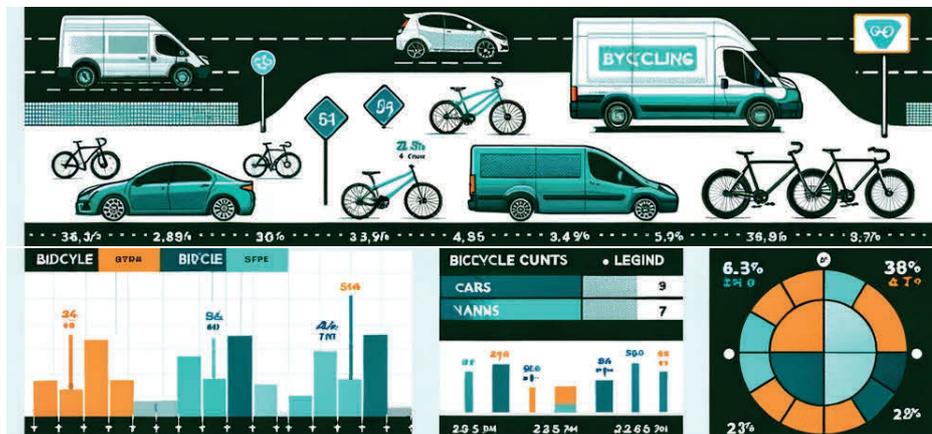

Strengths:

Hermes optional communication modules provide real-time data transfer, remote configuration. Double memory to record data by sd card and 512 MB Flash card. Compatible with the most widely used standard communication protocols, including NTCIP. Compatible with custom artificial intelligence algorithms (AI). Using the ETHERNET modem with the HERMES platform, the device can be configured and monitored in the same way both via a wired Ethernet connection and remotely through HERMES, just as with the GSM/GPRS modem.

	Power supply: 12V _{dc}		Type of power: 12V _{dc} 18Ah battery		Dimensions (H / L / W): 33,5 x 30 x 16 cm
	Communication interface: RS232, Wifi, Ethernet		Sensor: doppler radar K-Band horizontal opening 12° vertical opening 25° power 20 dBm		Weight: 2,9 kg
	Consumption: max: 0,065 A				Temperature: -20 °C - +85 °C

Monitoring "Compact 1000 JR"

Description:

Mobile system, with integrated radar technology, used for monitoring and classification of the traffic, installation on a pole beside the road or using any type of support.

The system permits to identify vehicles in two lanes or even in two opposite directions. Mainly used for short monitoring, it generates statistical data files about the mobility such as: date, time, speed, counting vehicles and the classification of the traffic.

Strengths:

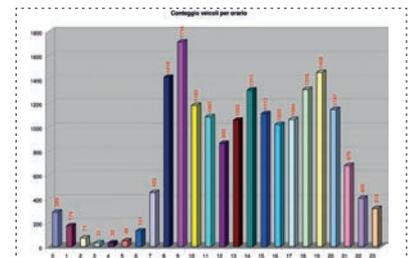

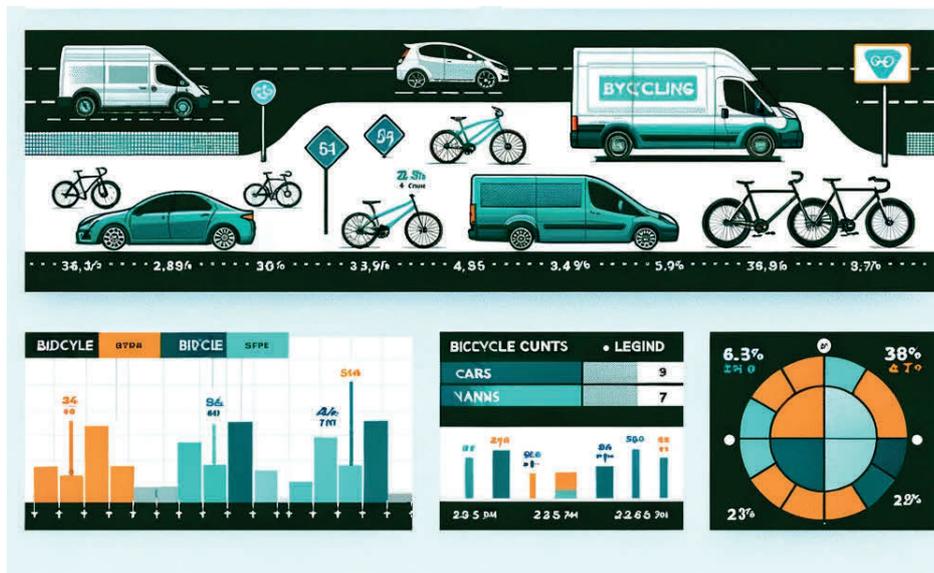

Non-invasive system, with small dimensions, it can be positioned on any kind of support, easy to install without making troubles to the vehicles. Low consumptions with relieve time until 9 days. Simple elaborating data file.

	Power supply: 12 V _{dc}		Type of power: 12V _{dc} 18Ah battery		Dimensions (H / L / W): 33,5 x 30 x 16 cm
	Communication interface: RS232, bluetooth		Sensor: doppler radar K-Band horizontal opening 12 ° vertical opening 25 ° power 20 dBm		Weight: 2,9 kg

Monitoring "Compact 1000 jr BIKE"

Description:

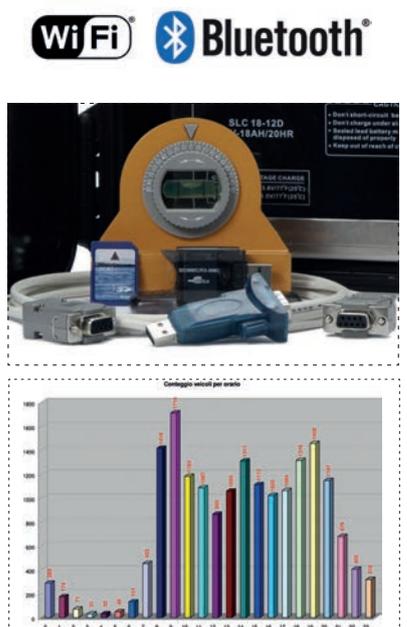

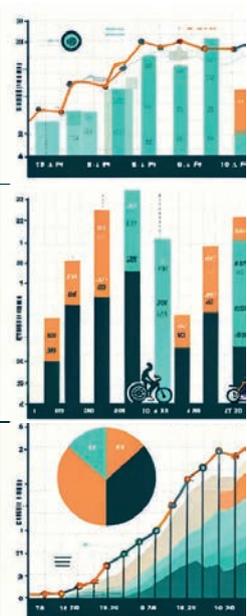

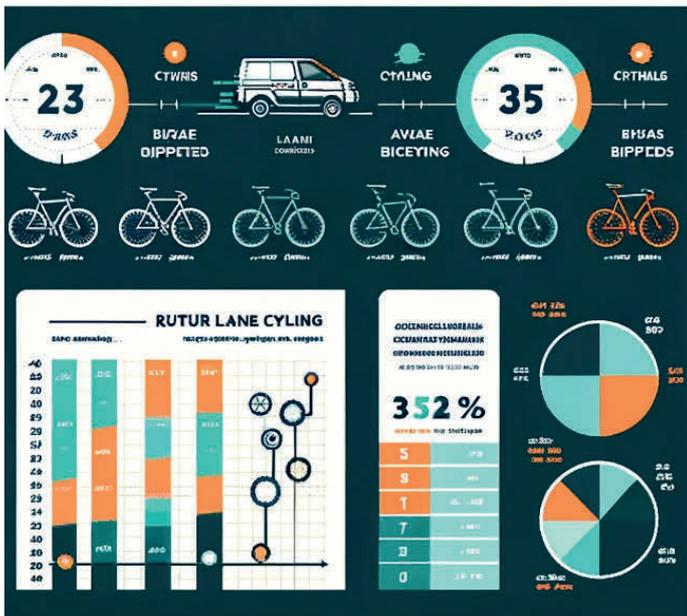

Compact 1000 jr Bike is a special monitoring device with doppler radar sensor used in bicycles lanes, easy to configure and to mount, the device can be installed in any kind of support. The compact 1000 jr Bike is able to monitor up to two directions.

Strengths:

The compact 1000 jr Bike detects the cyclists and downloads the data in the CSV format. The data can be checked taking off the Secure Digital card from the front door. Low consumption device, high reliability of the battery the duration of detection can reach up to 235 hours. The compact 1000 jr BIKE can detect different data such as: date, hour, speed and direction of the cyclists. The file can be easily downloaded and use for any statical purposes.

	Power supply: 12 V _{dc}		Type of power: 12V _{dc} 18Ah battery		Dimensions (H / L / W): 33,5 x 30 x 16 cm
	Communication interface: RS232, bluetooth		Sensor: doppler radar K-Band horizontal opening 12° vertical opening 25° power 20 dBm		Weight: 2,9 kg

DTS System DTS Slim Deluxe

Description:

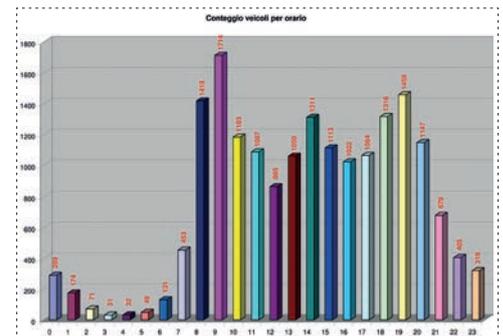

Device able to monitor the traffic based on 24 Ghz non-invasive radar technology, it is able to detect the approaching vehicles and to show their speed in its led display. It warns the driver that his speed is too high and catch his attention to warn of a possible danger or to inform the driver that he is exceeding the speed in that road. It is suggested to be used as speed dissuader next to schools, high density traffic roads, danger spots, road tools. The system can be connected remotely to a control centre to manage all the information, change and download data in real time. It is possible to set a text and change it remotely.

Strenghts:

The slim aluminum case grants a light weight and a reduced size. The aluminum permits also a longer life and an higher resistance to weathering. The led display grants high visibility and low consumption.

	Lenses: double flashing light Ø 100 mm; double flashing light Ø 200 mm		Brightness control: dynamic		Consumption: maximum 3,30 A/ med. 1,7 A min 0,18 A		Dimensions: 52 cm x 55,5 cm x 10 cm Sign on request
	Display: Numbers: 3 numbers 16,25,5 cm amber color Letters: 8 letters 8,5 x 5 cm amber color		Power supply: 12 V _{dc}		Type of power: network / fotovoltaic panel / public network		Box : Aluminium light color Font screen in Polycarbonate font opening
			Communication interfaces: RS232; USB; RS485; GSM		Sensor: doppler radar 24Ghz		Temperature: -15 °C - +85 °C

Code	Description

DTS System Slim Emoticon

Description:

Device based on radar technology able to relieve the speed of an approaching vehicle and show it through a display with a smile. Used as speed limit display near schools, main roads, crossings, highway tollbooths. It performs the

counting of the vehicles, generating statistical files such as: date, time, speed and counting.

Strengths:

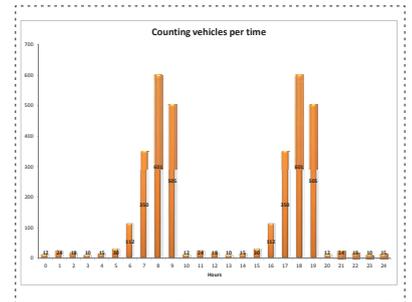

Data storage on external memory, programmable LED display, handling luminous signals (LED lamps). Box with reflective tape for better visibility.

Custom-made system.
External radar.

DTS Slim on Mobile Trailer

Description:

Mobile trailer for monitoring the traffic based on 24 Ghz non-invasive radar technology, it is able to detect the approaching vehicles and to show their speed in its led display. There are two different options with amber color or with bicolor (red/green) display.

Its usage is suggested in work zones, near schools, industrial areas, driving schools, accidents sites and in any place where it is necessary a quickly intervention to secure the road.

Strengths:

Mobile system very easy to use and place thanks to its small trolley and large wheels that grant a very good stability and protect the power supply battery.

accessories	Code	Description
	203400026	Power supply Battery charger 12 Volt 18 Ah

Pedestrian Light

with and without case

Description:

High visibility LED lens for pre-signaling pedestrian crossings. The device has the purpose to advice the driver to slow down, because of the presence of a pedestrian crossing.

Strengths:

Easy to install on a sign (without case) and on poles (with case), the LED lens guarantees high brightness and low consumptions. We suggest the use with products related to the pedestrian save.

	Light source: nr. 180 LEDs with pedestrian shape		Type of power: network photovoltaic panel public network battery		On/off switch: absent
	Light emission: yellow flashing light		Dimensions (H / L / W): 34 x 34 x 4 cm 34 x 34 x 22 cm (with case)		Weight: 1,2 Kg / 2,1 kg (with case)
	Luminous intensity: 1400 cd		Twilight: absent		Temperature: -15 °C - +85 °C
	Power supply: 12 / 24 V _{dc}		Luminous intensity regulation: variable intensity depending on ambient light		

Code	Description
201900311	Pedestrian light with case
201900252	Pedestrian light without case

DTS Media Panel

Description:

Interactive monitoring and security road system made of an alphanumeric display and a radar system able to handle events related to speed and counting vehicles. The device is mainly used in road sections considered most at risk such as: near schools, main roads, crossings, highway tollbooths and in urban areas.

Strengths:

It is possible to memorize numerous passages, it can guarantee the traffic monitoring memorizing all the information in a memory card (SD CARD). Thanks to the GSM is possible to modify the showed messages from the remote operative central. Statistical device for the traffic monitoring for application on vehicles.

	Lights: Ø 100mm / Ø 200mm (optional)		Power supply: 12 Vdc		Sensor: doppler radar 24Ghz
	Display: 10 characters/lines character dimension: 75 mm x 105 mm		Communication interface: USB, RS232, RS485, GSM		Dimensions (H / L / W): container: 1 line: 19,5 x 100x 10 cm 2 lines: 34,5 x 100 x 10 cm 3 lines: 50 x 100 x 10 cm

FULL CoLoR Graphic Display

Description:

Full-Color Info City Variable Message Panels are advanced graphic devices designed to display high-quality full-color images and symbols. These panels offer sharp and clear reproduction of images and text, making them ideal for applications where clear and effective visual communication is required.

CE-certified, they can be used in all fields where permitted by the regulations in force in the relevant country. They are particularly suitable for Info City contexts, where they are used to provide real-time information, advertising announcements, or institutional messages in public spaces.

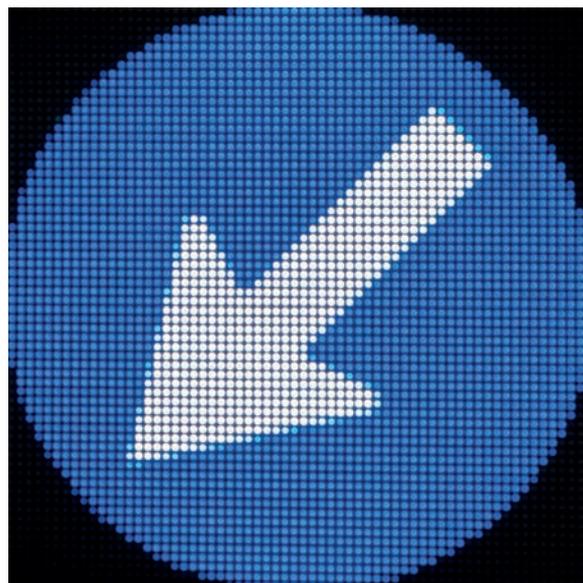

Thanks to their ability to display bright and well-defined images, they easily attract attention and can be customized with text and graphics according to specific needs. The modular design of these panels allows for custom configurations to adapt to various types of installations, with the possibility of adjusting the orientation to optimize visibility based on the installation requirements.

Strengths:

Full-color variable message signs ensure excellent visibility even in challenging lighting conditions, such as at night or in the presence of strong glare. They allow dynamic, real-time message updates to communicate traffic information, incidents, roadworks, weather conditions, and more.

They can be easily integrated with traffic management systems and monitoring platforms to optimize vehicle flow and route planning. Remote updating via web or app enables centralized and efficient management.

Designed for durability, they withstand bad weather conditions thanks to high-quality materials and protection against dust and moisture. Customizable graphics, icons, and multilingual messages make them suitable for urban environments and international areas, contributing to improved road safety by informing drivers in real time.

Pedestrian Save

Description:

Flashing security system for pedestrian crossings with a sensor that detects the presence of pedestrians.

The device is mainly used in street areas with high flow of pedestrians especially near schools, shopping centers, parks, rail stations, sports halls etc.

The system starts working when the sensor detects the presence of a pedestrian at the edge of the pedestrian crossing activating the lamps at both sides of the street.

Strengths:

Easily installation in existing road signs.

Thanks to the homologated modules at radio frequency, the device does not need any electrical connection.

The tri-flash LED optics guarantee the maximum efficiency warning the driver of the presence of a pedestrian.

Available with or without sign and with white or black tape application.

	Lenses: double Ø 100 mm tri-flash double Ø 200 mm tri-flash		Consumption: Ø100 mm medium 0,06 A maximum 0,42 A minimum 0,01 A		Sensor: doppler radar K-Band horizontal opening 80 ° vertical opening 32 ° power 13 dBm		Dimensions (H / L / W): central unit 10,8 x 11 x 10,2 cm
	Brightness control: 33% night 100% daytime		Ø200 mm medium 0,28 A maximum 1,8 A minimum 0,01 A			Type of power: network / photovoltaic panel / public network	
	Power supply: 12 V _{dc}			Temperature: -20 °C - +85 °C

Pedestrian Save

Sisas is able to offer you a wide range of pedestrian save systems according to your needs and specification. We can customize the item and make it exactly as required by the Norms of your country. The system can be available with black or white tape plates with led lights in 100 or 200 mm, or you can order just the electronic devices without signs, mounting the system in existing signs. Ask for personalized quotation and specification.

Pedestrian Alert Box

Description:

Flashing security system for pedestrian crossings with or without ALL-IN ONE sensor that relieves the presence of pedestrians. The device is mainly used in street areas with high flow of pedestrians especially near schools, shopping centers, parks, rail stations, sports halls etc. The system starts working when the sensor relieves the presence of a pedestrian at the edge of the pedestrian crossing activating the lamps at both sides of the street.

Strengths:

Easily installation in existing road signs.
Thanks to the homologated modules at radio frequency, the device does not need any electrical connection.
The tri-flash LED optics guarantee the maximum efficiency warning the driver of the presence of a pedestrian.
Available with or without sign and with white or black tape application.

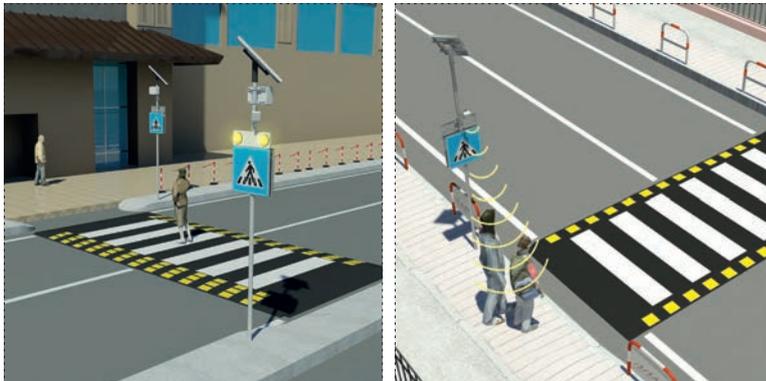

Pedestrian Alert Box with Ø 100 mm led optics (inside the box: 18 Ah battery and battery regulator)

without radar sensor

Pedestrian Alert Box with Ø 200 mm led optics (inside the box: 18 Ah battery and battery regulator)

	Certifications: Optics in compliance with UNI EN 12352		Power supply: 12 V _{dc}
	Type of battery: network / photovoltaic panel / public network / battery		Box: metallic black painted box with brackets
	Light source: 2 led optics with flashing and triflash luminous mode		Dimensions: 60 x 23,5 x 9,5 cm

Pedestrian Alert

Description:

Flashing security system for pedestrian crossings. The device is mainly used in street areas with high flow of pedestrians especially near schools, shopping centers, parks, rail stations, sports halls etc. System without pedestrian sensor.

Strengths:

Easily installation in existing road signs. The tri-flash LED optics guarantee the maximum efficiency warning the driver of the presence of a pedestrian crossing. Available with or without sign and with white or black tape application.

	Certifications: Optics in compliance with UNI EN 12352		Power supply: 12 V _{dc}		Luminous intensity regulation: variable intensity depending on ambient light
	Light source: 2 led optics Ø 200 mm, with 120 high luminosity leds		Type of battery: 18Ah		
	Luminous emission: yellow flashing light		Autonomy: 160 h with standard flashing; 500 h with flash		Weight: 22,5 Kg
	Luminous intensity: Class L8H		Twilight: absent		Temperature: -15 °C - +85 °C

technical datasheet

Code	Description

203000004	50W photovoltaic kit

Code	Description
205600038	Pedestrian alert with 50W solar panel and double Ø 200 mm tri-flash flashing lights couple

Interactive Signals "One Way"

Description:

This system has been developed in order to detect and show wrong direction way. The kit is composed by a radar sensor for detecting vehicles coming in the wrong way. Mainly used in highway

entries, one way urban streets. The item includes:

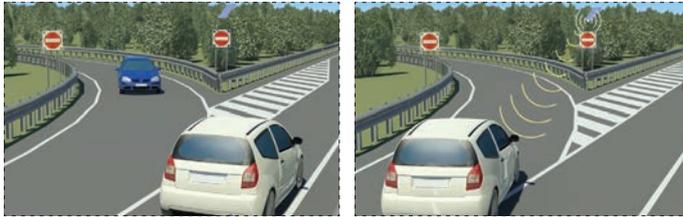

- Radar sensor
- 105x105 aluminum sign with EG tape
- 4 led lights 100 mm
- Brackets for 60 cm pole
- Power supply (not included)

Strengths:

Non-invasive installation, LED optics at high brightness, reduced consumptions.

	Certifications: Optics in compliance with UNI EN 12352		Power supply: 12 V _{dc}		On / off switch: absent
	Light source: Ø 100 mm 4 led optics		Type of power: batteries / photovoltaic panel / public network		Dimensions (H / L / W): 105 x 105 x 6 cm central unit 30 x 22 x 12 cm
	Luminous emission: yellow flashing light		Consumptions: medium 140 mA maximum 650 mA		Weight: 10,2 Kg
	Luminous intensity: Class L2H		Twilight: absent		Temperature: -15 °C - +85 °C

technical datasheet

Code	Description
205600010	One Way

Interactive Signals "Ice 500"

Description:

Electronical device used to detect the presence of ice, with control of the temperature and humidity. The two optics activate themselves if the temperature goes under a threshold.

The item includes:

- Humidity sensor
- 60x90 aluminum sign with HI tape
- 2 led lights 100 mm
- 20W solar panel kit
- Brackets for 60 cm pole

Strengths:

Non-invasive installation, LED optics at high brightness, reduced consumptions, remote version for signaling the presence of ice.

	Certifications: Optics in compliance with UNI EN 12352		Power supply: 12 V _{dc}		On - off switch: absent
	Light source: Ø 100 mm 2 led optics		Type of power: network / photovoltaic panel / public network		Dimensions (H / L / W): sign 90 x 60 x 6 cm unit 30 x 22 x 12 cm
	Luminous emission: yellow flashing light		Consumption: medium 25 mA maximum 450 mA		Weight: 19 Kg
	Luminous intensity: Class L2H		Luminous intensity regulation: variable intensity depending on ambient light		Temperature: -15 °C - +85 °C

technical datasheet

Code	Description
205500019	Ice 500

Air Guard

Description:

Air Guard is an advanced stand-alone IoT sensor for real-time air quality monitoring. It is the ideal solution for deploying scalable, cost-effective, low-power, and easy-to-install networks for fine particulate matter detection, suitable for any urban or industrial environment.

The sensor features forced ventilation to ensure accurate measurements, and readings are expressed in $\mu\text{g}/\text{m}^3$. It also integrates an air temperature and humidity sensor.

Strengths:

The sensor can monitor fine particulate matter (PM10) in real time, detecting particles from $10 \mu\text{m}$ down to $0.3 \mu\text{m}$. Measurements are divided into three categories: PM10, PM2.5, and PM1, with the following ranges:

PM10: $10 \mu\text{m} - 0.3 \mu\text{m}$ PM2.5: $2.5 \mu\text{m} - 0.3 \mu\text{m}$ PM1: $1 \mu\text{m} - 0.3 \mu\text{m}$

It can be connected remotely via GSM LTE modem to the Sisas Hermes platform or other compatible platforms. If not actively queried, the sensor transmits hourly samples based on a 5-minute average. Air sampling occurs every 5 seconds and can be requested remotely via command.

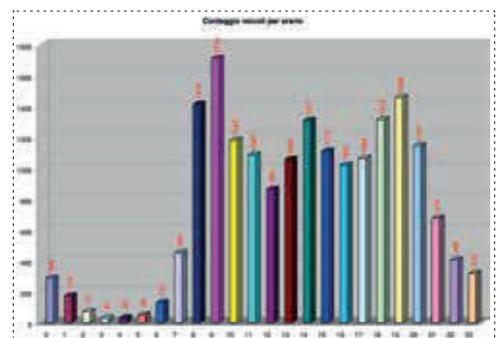

The sensor can be easily installed on any type of support. Its enclosure includes two displays: a bar display and a numeric display. The bar display visually represents air quality, worsening as more light bars are illuminated, and is

divided into sectors.

Air Guard is an advanced stand-alone IoT sensor for real-time air quality monitoring. It is designed for deploying scalable, cost-effective, low-power, and easy-to-install networks for detecting fine particulate matter in both urban and industrial environments.

	Lenses: (OPTIONAL with plate) Double flashing lights 100 mm Double flashing lights 200 mm		Brightness control: dynamic		Consumption: Digital board average consumption 75mA		Dimensions: 38 cm x 27 cm x 10 cm Sign on request

FAS 101 - Radio Subway Flooding System

Description:

The Flooding Alarm System is a sophisticated modular alarm system designed to protect the drivers against the risk of subway flooding. The high reliability analogical-digital sensor is able to detect the eventual flood and to generate in the real time an alarm that can be sent to a control unit located outside the subway.

The control unit is power supplied with a tampon battery or through a solar panel and it can activate led lights, sensors, traffic lights or any other devices located at the entrance of the subway to warn the drivers about a danger.

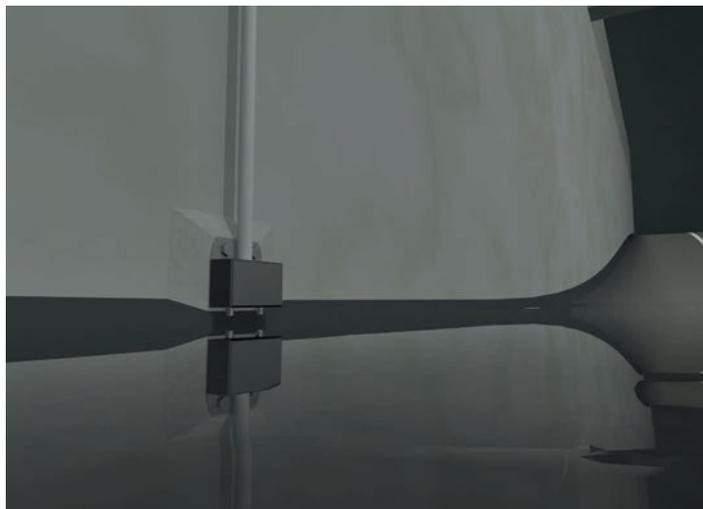

The control unit can also send warning messages to the Security Services with an sms.

Strengths:

Reliability of the system, without any cable for the installation, it makes it the perfect product to be used to secure eventual dangerous subways with a low cost of installation and maintenance.

	Light source: Led lights with flash or trflash mode		Type of power: network; photovoltaic panel; public network
	Communication interfaces: Radio Module 868 Mhz		Power supply: 12 V _{dc}

General Sales Conditions

We can not fill orders with total amount less than 250 €. For orders that are lower than this amount Sisas will decide if accept them or not, anyway Sisas will inform in a very short time the customer about this decision.

Orders

The orders can be considered accepted after "order confirmation" reception from the customer. SISAS declines any responsibility for any mistakes due to fail or insufficient indications on the purchase orders.

Delivery

For quick filled of an order we suggest to order the items per box. The items in the present catalogue are usually ready to be sold. The delivery date must be considered indicative and if not respected, for different reasons, can not be considered a cause of redraft. We will not deliver any goods if there is from the customer any overdue invoices.

Shipments

All the shipment cost will be charged to the customer.

Packaging

Free of charge, except for special workmanship.

Claims

It is up to the consignee check the goods when arrived in the warehouse and immediatly inform the forwarder of any lackings or breakings.

We are not responsible for damages caused during the journey if not reported in the forwarder's documents.

Claims must be made within 8 days from the collecting of the goods.

Any claims and objections of the goods can not exempt the costumer to collect any remaining goods in the order.

Sales returns

In any case, if not authorized by our sales department in written, the costumer can re-send the goods back to the supplier.

The goods returned back must be undamaged in their original packages.

Warranty

In case of proved defective goods, according to the decision of the supplier, it will be managed to replace or issue a credit note of the authorized amount.

We will not accept any retuned goods sent without this authorization.

Payment

The payment will be agreed together with the supplier at the moment of the order.

This catalog will replace any conflicting information contained in previous editions, even if controlled, could contain typographical errors.

Photographs and images contained within the catalog are purely illustrative, technical data and specifications of products may therefore be subject to variations, Sisas reserves it self the right to change at any time without notice.
